

Agenda Report

DATE: DECEMBER 16, 2025

TO: CITY COUNCIL

FROM: PUBLIC WORKS—ENGINEERING

SUBJECT: ADOPTION OF RESOLUTION ACCEPTING ANNUAL REPORT ON FISCAL YEAR 2025 DEVELOPMENT FEES AND MAKING CERTAIN FINDINGS REGARDING UNEXPENDED FEES

STATEMENT OF ISSUE:

The Mitigation Fee Act (California Government Code section 66000 et. seq.) requires public agencies to prepare an annual report containing the information on the fees collected in connection with the approval of development projects. The City of Walnut Creek collects several fees that fall under the purview of the Mitigation Fee Act.

In compliance with Government Code Section 66006(b), this Agenda Report and all attachments were filed with the City Clerk's Office and made available to the public on December 1, 2025, at least fifteen (15) days prior to the date of this meeting. Additionally, Government Code Section 66001(d) (1) requires the City Council to make certain findings with respect to any unexpended development fees in accounts held by the City.

RECOMMENDED ACTION:

Adopt the proposed resolution accepting the report of development impact fees and expenditures for the fiscal year ending June 30, 2025, and making the findings regarding unexpended fees.

DISCUSSION:

State law requires public agencies, which impose and collect fees in connection with the approval of development projects, to prepare and make available to the public an annual report containing the information set forth in Government Code Section 66006(b). The report must be available to the public no later than 180 days after the end of the fiscal year and must be presented to the City Council at least fifteen (15) days after it is made available to the public.

This staff report provides the following information regarding the status of the City's development impact fees:

1. A brief description of the applicable fees (see discussion below).
2. The beginning and ending fund balance of each fee account (Attachment 2);
3. The amount of fees collected, and interest earned for each account during the prior fiscal year (Attachment 2); and,
4. An identification of each public improvement on which fees were expended during the prior fiscal year and the amount of expenditures on each improvement, including the total

percentage of the cost of the public improvement that was funded with the fees (Attachment 3).

Additionally, Government Code Section 66001(d) (1) requires the City Council to make the following findings every five (5) years with respect to unexpended development fees in accounts held by the City, whether committed or uncommitted:

1. Identify the purpose to which the fee is to be put;
2. Demonstrate a reasonable relationship between the fee and the purpose for which it is charged;
3. Identify all sources of and amounts of funding anticipated to complete financing in incomplete improvements; and,
4. Designate the approximate dates on which the funding referred to immediately above is expected to be deposited into the appropriate account or fund.

In compliance with Government Code Section 66006(b) and Government Code Section 66001(d) (1), this Agenda Report and all attachments were filed with the City Clerk's Office and made available to the public at least fifteen (15) days prior to the date of this meeting.

In-Lieu Underground Fee

Undergrounding utilities mitigates and minimizes the impact of new construction in the downtown Core Area by protecting new infrastructure, as well as providing aesthetic, safety, and environmental benefits. The City has been using the In-Lieu Underground fee to eliminate unsightly above-ground utilities, which are comprised of electric, telephone, and cable TV overhead wiring on wooden poles.

Funds used for undergrounding utilities include Rule 20A and the City In-Lieu Underground fees collected from developers. Rule 20A funds are mandated by the State to be set aside by PG&E for undergrounding of its facilities. Within the Core Area, subdivision or site development projects that include a new building or an expansion of an existing building by more than 50 percent require all overhead utility lines along peripheral streets to be relocated underground or an in-lieu fee for this undergrounding work will be collected. The current City In-Lieu Underground fee is estimated at \$2,000 per foot, which is divided evenly between the properties fronting along both sides of the street. This fee is applied pursuant to Walnut Creek Municipal Code Section 9-9.206(e).

As of June 30, 2025, the In-Lieu Fund Underground Fund (Fund 154) has \$656,071 in unexpended In-Lieu Underground Fees. The fund did not receive any fees during FY25 and expended \$500,205 for undergrounding utilities for the new mixed-use affordable housing development at 699 Ygnacio Valley Road. As of June 30, 2025, \$173,169 of In-Lieu Underground Fee funds have been appropriated in Capital Project No. CP009776 for Undergrounding Utilities.

The unappropriated fund balance of \$482,902 (Attachment 2) will be set aside for the future utility undergrounding projects within the downtown core area, as part of 10-year Capital Improvement Program. Currently, City staff estimates this work will begin within the next ten (10) years, depending on PG&E's workload and funding.

Storm Drain Fee

This fee was established by the City Council in 1979 by Ordinance 1434. In June 1993, this ordinance was amended by Ordinance 1823, when a project was proposed to alleviate overflow and flooding at the Contra Costa Canal in Heather Farm Park. This drainage fee is collected from new subdivisions and new construction in excess of 500 square feet within the Specific Plan #6 area (La Casa Via vicinity). The purpose of the drainage fee is to construct drainage improvements within the specific drainage area boundaries to mitigate storm water runoff from the increased impervious surface from new development and/or redevelopment projects. The current fee is \$10,262 per acre and is updated annually the week nearest January 1, based on the Engineering News-Record Construction Cost Index for San Francisco.

The fee collects in the Storm Drain Fund (Fund 156). No fees were collected in FY25. As of June 30, 2025 the fund contains \$635,998 in unexpended fees, all of which are unappropriated (Attachment 2). The fund is intended to make a detailed study of downstream drainage facilities and to complete off-site drainage improvements within the Specific Drainage #6 area boundaries (La Casa Via vicinity) to alleviate overflow and flooding at the Contra Costa Canal in Heather Farm Park. The work would be paid with current and future storm drain fees. Since the collection of this fee is based on private developments, it is difficult to predict when sufficient funds will be collected to begin work on this project. Currently, City staff estimates it will be approximately fifteen (15) years until this project is fully funded. No other funds are currently available for this project.

In-Lieu Creek Restoration Fee

The In-Lieu Creek Restoration fee was adopted by Ordinance 1892 in 1996 as part of a development agreement with Kaiser Medical Hospital to construct its facility in downtown Walnut Creek. As part of the agreement, Kaiser agreed to dedicate to the City right-of-way for creek restoration and the creek trail, and monetary contributions toward these efforts. Kaiser has contributed a total of \$200,000 to this fund, which has earned interest while planning for improvements. As of June 30, 2025, the In-Lieu Creek Restoration Fund (Fund 157) contains \$308,632 in unexpended In-Lieu Creek Restoration Fees. Of these funds, \$50,000 has been appropriated (CP009915, Attachment 2) to a creek restoration study to identify and conceptually plan potential creek restoration projects along Las Trampas Creek. The study will be part of the Creek and Wetland Restoration project within the 10-year Capital Improvement Program. The unappropriated fund balance of \$258,632 (Attachment 2) is intended for improvements along Las Trampas Creek that may be identified in the study.

In-Lieu Park Fee

For residential subdivisions and multifamily developments, developers are required to dedicate land for park use or pay an In-Lieu Park fee. Since the purpose of the fee is to enhance the City's park system to accommodate the additional residents, the dedication or fee is based on the number of new residents within the development and the amount of parkland required for each new resident (5 acres per 1,000 persons). Either the required amount of new park land must be dedicated, or an in-lieu fee must be paid equal to the fair market value of the required dedication area. The assumed fair market value of property for the purpose of calculating the in-lieu park fee is currently \$800,000 per acre.

The dedication or in-lieu fee requirement for subdivisions is found in Walnut Creek Municipal Code Section 10-1.602 and for multifamily developments in Walnut Creek Municipal Code Section

10-12.101. The current policy is to utilize the fees collected for the construction and maintenance of park and recreation facilities throughout the City. The Park, Recreation and Open Space (PROS) Commission reviews the schedule that specifies how, when and where the City will develop park or recreation facilities and the City Council makes a determination to incorporate said developments into the Capital Budget.

As of June 30, 2025, the In-Lieu Park Fund (Fund 158) contains \$3,472,738 in unexpended In-Lieu Parkland Dedication Fees. The In-Lieu Park Fund has funded recent projects including the Heather Farm Park court resurfacing, park infrastructure repairs and open space infrastructure repairs. During FY25, \$216,000 In Lieu Park fees were collected. \$215,155 of Park in Lieu funds were expended in FY25. In addition, as of June 30, 2025, \$2,527,596 is appropriated for several projects including court resurfacing at Rudgear Park & Arbolado Park, open space infrastructure repairs, park infrastructure repairs, park equipment replacement and Heather Farm Synthetic Turf Field 1 & 2 as detailed in Attachment 3.

The remaining unappropriated funds of \$945,142 will be appropriated in future Capital Budgets. The City has prepared a plan to improve City's parks with capital projects funded by the In-Lieu Park Fee. Specific projects and anticipated timeline can be found in the 2026-2035 Ten-Year Capital Improvement Plan, as approved by the City Council on June 17, 2025 (Attachment 4). City staff estimates that all the currently unexpended funds described above will be spent within the next ten (10) years on projects identified in the 2026-2035 Ten-Year Capital Improvement Program.

In-Lieu Public Art Fee

The purpose of the In-Lieu Public Art Fund (Fund 159) is to support art in public spaces to help maintain and enhance Walnut Creek's position as a regional leader in arts and culture. The City's Public Art Master Plan, adopted by the City in 2000 and revised in 2016, provides guidelines for use of the In-Lieu Public Art Fund. New private development and significant private alteration projects are required to incorporate public art elements into their site improvements or pay a fee in lieu of an on-site art installation. The in-lieu fee is paid into the In-Lieu Public Art Fund and is calculated pursuant to Walnut Creek Municipal Code Section 10-10.100.

In 2018, the Arts Commission adopted a Public Art Strategic Plan. The purpose of the plan is to guide, support and grow the Public Art Program while engaging the community, attracting visitors and building awareness of the value and benefits of the arts.

As of June 30, 2025, the In-Lieu Public Art Fund contains \$1,767,723 in unexpended In-Lieu Public Art Fees, of which \$386 is appropriated. The Public Art Fund's unappropriated fund balance of \$1,767,336 will be used to support the administration of the Public Art Program, maintain and conserve existing artworks, and implement new public art projects identified in the program's strategic plan, as designated by City Council upon the recommendation of the Arts Commission.

In FY24, the public art requirement was triggered by the City's plan to build a new Aquatics and Community Center at Heather Farm Park. Adhering to the Public Art Ordinance, municipal construction projects must provide art with a value equal to at least one percent (1%) of the construction cost. To fulfill the public art requirement at Heather Farm Park, staff developed an RFQ and RFP for a public art project. The project is expected to be completed in FY27 with payments made in FY26 and FY27 to the project awardee(s).

In FY25, the In-Lieu Public Art Fund received \$423,521 in fees. \$43,753 was spent on staff time and \$68,697 was spent on contractual services as allowed by the City ordinance. Contractual services expenditures included restoration of *Fountain Head*, the iconic sculpture by artist Seyed Alavi, located on North Main. The work (and corresponding expenditures) for this project spanned two fiscal years, with some expenditures in FY24. Additional funds from the Public Art Fund were used for the biennial maintenance of Benjamin Bufano's *Hand of Peace* at Civic Park.

Looking ahead to FY26, the Public Art Program will continue to move the Heather Farm Park public art project forward into the concept development and execution phase. Staff also plan to revisit the outdoor rotating sculpture program in downtown, a project that will display an eclectic array of loaned sculptures on a cyclical basis. Concrete pads with accent lighting will be fabricated and installed as permanent bases to support the temporary sculpture curated for the program.

Arts + Recreation staff and the Arts Commission are budgeting a significant portion of the unappropriated fund balance over the next five years for mural program expansion, the rotating sculpture program, and the Heather Farm Park project, while also reserving funds for anticipated and unanticipated maintenance and restoration of works in the City's growing and maturing public art collection.

In-Lieu Parking Fee

All development projects must meet requirements for on-site parking and loading as specified under Walnut Creek Municipal Code Sections 10-2.3.201 – 10.2.3.208. Pursuant to Section 10-2.3.204.C, an applicant for a development project in the pedestrian retail zoning district may request the City Council to allow payment of an in-lieu fee instead of providing some or all of the required on-site parking spaces. The purpose of the fee is to provide for the required parking spaces within the Pedestrian Retail Zoning district. The in-lieu fee cost of a parking space is calculated by dividing the cost of construction of a public parking garage, adjusted for inflation, by the number of parking stalls provided within that garage. As of December 2024, the in-lieu fee cost of a parking stall, without a percent cost applied, is \$53,683.16.

The fee accumulates in the In-Lieu Parking Fund (Fund 162), which contained \$1,569,241 in unexpended fees as of June 30, 2025. In FY25, \$28,721 in fees were collected. The fund's unappropriated fund balance of \$1,569,241 (Attachment 2) will be used to fund parking-related capacity improvement projects within the existing City's parking garages in the downtown area. City staff will seek opportunities to expend funds described above within the next ten (10) years on those improvement projects.

Traffic Impact Mitigation Fee

The Traffic Impact Mitigation Fee (TIF) is paid by developers of new projects. The fee is used for the construction of City capital transportation improvements projects that will mitigate cumulative traffic impacts caused by new developments. The eligibility of the projects is determined by either improving the capacity of the transportation network system, or encouraging the system for other modes, and therefore, diversifying demand among walking, biking, and transit modes.

The TIF fee is collected from developers for the new development, pursuant to Walnut Creek Municipal Code Section 10-5.102. On August 1, 2017, the City Council adopted Resolution 17-63 revising the Traffic Impact Fee. The current TIF fee is the product of a nexus study which took into account the number of the vehicle trips generated by the development during the afternoon peak

commute hour multiplied by a flat fee of \$5,323. The trip generation rate is based on the latest published Trip Generation Manual by the Institute of Transportation Engineers (ITE). The flat fee is updated annually the week nearest January 1st of every year, based on the Construction Price Index.

The fees accumulate in the Traffic Impact Mitigation Fund (Fund 168). As of June 30, 2025, the fund contains \$10,592,342 in unexpended Traffic Impact Mitigation Fees. In FY25, \$747,646 in TIF fees were collected.

During FY25, \$630,988 in TIF funds were expended on traffic safety improvements on Ygnacio Valley Road, Shadelands multimodal improvements, pedestrian improvements at non-signalized crosswalks and bicycle facilities throughout the City.

As of June 30, 2025, \$9,113,953 is appropriated for qualifying traffic projects (Attachment 2). The unappropriated fund balance is \$1,478,389. On June 17, 2025, the City Council approved the 2026-2035 Ten-Year Capital Improvement Plan (Attachment 4), which identified specific TIF projects and anticipated timelines, based on projected revenues.

PUBLIC NOTICING:

In compliance with Government Code Section 66006(b), this Agenda Report and all attachments were filed with the City Clerk's Office and made available to the public on December 1, 2025, at least fifteen (15) days prior to the date of this meeting. Additionally, the documents were made available to the public on the City's website at: <http://www.walnut-creek.org/departments/public-works/annual-report-on-development-fees> and fees.

FINANCIAL IMPACTS:

If the resolution with the findings is not adopted, per the Mitigation Fee Act, the City shall refund the moneys in the accounts collected.

ALTERNATIVE ACTION:

Council could decide not to adopt the resolution with the findings of fees collected in connection with the approval of development projects. If the resolution with the findings is not adopted, per the Mitigation Fee Act, the City shall refund the moneys in the accounts collected

DOCUMENTS:

- Attachment 1: Proposed Resolution
- Attachment 2: Summary of Developer Fee Fund Balances as of June 30, 2025
- Attachment 3: Active Developer Fee Funded Projects as of June 30, 2025
- Attachment 4: 2026-2035 Ten-Year Capital Improvement Plan

CITY COUNCIL ACTION RECOMMENDED:

Move to adopt the resolution, accept the report of development impact fees and expenditures for the fiscal year ending June 30, 2025, and accept the findings regarding unexpended fees.

**CITY OF WALNUT CREEK
RESOLUTION NO. ____**

**A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF WALNUT CREEK
ACCEPTING THE MITIGATION FEE ACT 2024-2025 ANNUAL REPORT ON
DEVELOPMENT FEES AND MAKING CERTAIN FINDINGS REGARDING
UNEXPENDED FEES**

WHEREAS, the Mitigation Fee Act (California Government Code Section 66000 *et. seq.*) authorizes the City to impose, collect, and expend fees to mitigate the impacts of development within the City;

WHEREAS, the Mitigation Fee Act requires the annual disclosure of information in accordance with California Government Code Section 66006(b), including but not limited to the amount of each fee, the beginning and ending balances of each fee account or fund, and the interest earned thereon (the “Annual Report”); and

WHEREAS, the Mitigation Fee Act additionally requires that the City Council make specific findings, as more particularly set forth in California Government Code Section 66001(d), with respect to any fees that may have been collected more than five (5) years ago and remain on deposit with the City.

**NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF WALNUT CREEK
DOES RESOLVE AS FOLLOWS:**

Section 1. In accordance with California Government Code Section 66006(b), the City Council has reviewed and hereby accepts the Fiscal Year 2025 (July 1, 2024-June 30, 2025) Annual Report, specifically consisting of the Agenda Report dated December 16, 2025, and all associated attachments thereto. The Annual Report was previously filed with the City Clerk’s Office and made available to the public on or before December 1, 2025.

Section 2. The City Council further finds and determines that, as of June 30, 2025, the **In-Lieu Underground Fund (Fund 154)** contains Six Hundred Fifty-Six Thousand Seventy-One Dollars (\$656,071) in unexpended In-Lieu Underground Fees and that:

A. The purpose of the In-Lieu Underground Fee is to eliminate unsightly above-ground utilities by placing the utilities underground in the downtown area. The utilities are comprised of electric, telephone, and cable TV overhead wiring on wooden poles. There is a reasonable relationship between the fee and the purpose for which it is being charged because undergrounding utilities mitigates and minimizes the impact of new construction by protecting new infrastructure, as well as providing aesthetic, environmental, and safety benefits.

B. The remaining unexpended funds in the In-Lieu Underground Fund will fund the following projects:

(1) One Hundred Seventy-Three Thousand One Hundred Sixty-Nine Dollars (\$173,169) of such unexpended funds are currently appropriated in CP009776 for future utilities undergrounding projects at various locations. Given PG&E’s workload, these projects can take over five (5) years to complete.

(2) Four Hundred Eighty-Two Thousand Nine Hundred and Two Dollars (\$482,902) in remaining unappropriated funds are expected to fund the future formation of a district to

underground the utilities on Civic Drive within the downtown core area, as part of future Capital Budgets. Currently, City staff estimates this project will begin within the next ten (10) years, depending on PG&E's workload and funding.

C. Based on the foregoing, a continuing need has been demonstrated for the fees in the In-Lieu Underground Fund.

Section 3. The City Council further finds and determines that, as of June 30, 2025, the **Storm Drain Fund (Fund 156)** contains Six Hundred Thirty-Five Thousand Nine Hundred Ninety-Eight Dollars (\$635,998) in unexpended Storm Drain Fees and that:

A. The purpose of the Storm Drain Fund is to construct drainage improvements within the Specific Drainage #6 area boundaries (La Casa Via vicinity) and to mitigate the increased impervious surface from new development and/or redevelopment project. There is a reasonable relationship between the fee and the purpose for which it is being charged because a project was proposed to alleviate overflow and flooding at the Contra Costa Canal in Heather Farm Park, thereby protecting new infrastructure from potential flooding.

B. The fund's unappropriated fund balance of Six Hundred Thirty-Five Thousand Nine Hundred Ninety-Eight Dollars (\$635,998) is intended to undertake a detailed study of downstream drainage facilities and to complete off-site drainage improvements within the Specific Drainage #6 area boundaries (La Casa Via vicinity) to alleviate overflow and flooding at the Contra Costa Canal in Heather Farm Park.

C. The City's funding source for the projects described above consists of both the unexpended fees and future Storm Drain Fees to be collected. Since the collection of this fee is based on private developments, it is difficult to predict when sufficient funds will be collected to begin this project. Currently, City staff estimates it will be approximately fifteen (15) years until this project is fully funded. No other source of funds is currently available for this project.

D. Based on the foregoing, a continuing need has been demonstrated for the fees in the Storm Drain Fund.

Section 4. The City Council further finds and determines that, as of June 30, 2025 the **In-Lieu Creek Restoration Fund (Fund 157)** contains Three Hundred Eight Thousand Six Hundred Thirty-Two Dollars (\$308,632) in unexpended In-Lieu Creek Restoration Fees and that:

A. The purpose of the In-Lieu Creek Restoration Fee is to study, identify, and conceptually plan potential creek restoration and creek trail projects along Las Trampas Creek, thereby mitigating the downstream impact in the creek created by the increased impervious surface as a result of a new facility, which was constructed by Kaiser in downtown Walnut Creek. There is a reasonable relationship between the fee and the purpose for which it was charged because the creek restoration projects, to be identified by the study, are to provide environmental benefits to creek ecosystem.

B. The unexpended funds in the In-Lieu Creek Restoration Fund will fund a creek restoration study and the Las Trampas Creek Improvements projects that may be identified in the study. \$50,000 has been appropriated in CP009915. The study will be part of the Creek and Wetland Restoration project within the 10-year Capital Improvement Program.

C. Based on the foregoing, a continuing need has been demonstrated for the fees in the In-Lieu Creek Restoration Fund.

Section 5. The City Council further finds and determines that, as of June 30, 2025 the **In-Lieu Park Fund (Fund 158)** contains Three Million Four Hundred Seventy-Two Thousand Seven Hundred Thirty-Eight Dollars (\$3,472,738) in unexpended In-Lieu Parkland Dedication Fees and that:

A. The purpose of the In-Lieu Parkland Dedication Fee is to enhance the City's park system to accommodate the additional residents. There is a reasonable relationship between the fee and the purpose for which it is being charged because various City Capital enhancements and improvements projects use the fee to mitigate the impact of the increased population on City's parks as a result of new development and/or redevelopment projects.

B. Two Million Five Hundred Twenty-Seven Thousand Five Hundred Ninety-Six (\$2,527,596) is appropriated for several projects, including but not limited to court resurfacing at Rudgear Park & Arbolado Park, open space infrastructure repairs, park infrastructure repairs, park equipment replacement and Heather Farm Synthetic Turf Field 1 & Field 2, among other project, all as detailed in Attachment 2. These projects are expected to be completed within next six (6) years. The remaining unappropriated fund balance of Nine Hundred Forty-Five Thousand One Hundred Forty-Two Dollars (\$945,142) in the In-Lieu Park Fund will fund the projects identified in the 2026-2035 Ten-Year Capital Improvement Program with anticipated timeline, as approved by the City Council on June 17, 2025.

C. Based on the foregoing, a continuing need has been demonstrated for the fees in the In-Lieu Park Fund.

Section 6. The City Council further finds and determines that, as of June 30, 2025, the **In-Lieu Public Art Fund (Fund 159)** contains One Million Seven Hundred Sixty-Seven Thousand Seven Hundred Twenty-Three Dollars (\$1,767,723) in unexpended In-Lieu Public Art Fees and that:

A. The purpose of the In-Lieu Public Art Fee is to support public art in public spaces to help maintain and enhance Walnut Creek's position as a regional leader in arts and culture. There is a reasonable relationship between the fee and the purpose for which it is being charged because new development and significant redevelopment projects are required to incorporate public art elements into their site improvements or pay an in-lieu fee to support public art in public places.

B. The remaining unexpended funds in the in the Public Art Fee will fund the following projects:

(1) Three Hundred Eighty-Six Dollars (\$386) is appropriated to complete the Veterans Memorial Plaza Renovation. One Million Seven Hundred Sixty-Seven Thousand Three Hundred Thirty-Six Dollars (\$1,767,336) in remaining unappropriated funds are expected to support the administration of the Public Art Program, maintain existing artworks, and implement new public art projects identified in the new strategic plan, as designated by the City Council upon the advice of the Arts Commission.

C. In 2018, the Arts Commission adopted a Public Art Strategic Plan, which defines proposed new projects for the use of the In-Lieu Public Art Fund. In Fiscal Year 2023, the Arts Commission revisited the Strategic Plan and reaffirmed priorities. Planned future projects include a substantial public art project at the new aquatic and community center at Heather Farm Park and a rotating outdoor sculpture

program in downtown. City staff estimates that all the unexpended funds described above will be spent within the next ten (10) years on new projects to be identified in the Public Art Strategic Plan, continued maintenance of existing public art, and other staffing needs.

D. Based on the foregoing, a continuing need has been demonstrated for the fees in the In-Lieu Public Art Fund.

Section 7. The City Council further finds and determines that, as of June 30, 2025, the **In-Lieu Parking Fund (Fund 162)** contains One Million Five Hundred Sixty-Nine Thousand Two Hundred Forty-One dollars (\$1,569,241) in unexpended In-Lieu Parking Fee Fees and that:

A. The purpose of the In-Lieu Parking Fee is to construct parking-related capacity improvements projects within the existing City's parking garages in the downtown area. There is a reasonable relationship between the fee and the purpose for which it is being charged because development projects must pay an in-lieu fee instead of providing some or all the required on-site parking spaces in their developments.

B. The unappropriated funds, One Million Five Hundred Sixty-Nine Thousand Two Hundred Forty-One Dollars (\$1,569,241), in the In-Lieu Parking Fund will fund parking-related capacity improvements projects within the existing City's parking garages in the downtown area. City staff seek opportunities to expend funds described above within the next ten (10) years on those improvement projects.

C. Based on the foregoing, a continuing need has been demonstrated for the fees in the In-Lieu Parking Fund.

Section 8. The City Council further finds and determines that, as of June 30, 2025, the **Traffic Impact Mitigation Fund (Fund 168)** contains Ten Million Five Hundred Ninety-Two Thousand Three Hundred Forty-Two Dollars (\$10,592,342) in unexpended Traffic Impact Mitigation Fees and that:

A. The purpose of the Traffic Impact Mitigation Fee is to construct transportation improvements that will mitigate cumulative traffic impacts caused by new developments throughout the city. There is a reasonable relationship between the fee and the purpose for which it is being charged because various City Capital transportation improvements projects use the fee to mitigate the impact of the increased traffic generated by new developments.

B. The appropriated funds, Nine Million One Hundred Thirteen Thousand Nine Hundred Fifty-Three Dollars (\$9,113,953) in the Traffic Impact Mitigation Fund will fund construction of various City capital transportation improvements projects that will either improve the capacity of the transportation network system, or encourage the system for other modes, and therefore, diversifying demand among walking, biking, and transit modes.

C. The unappropriated funds, One Million Four Hundred Seventy-Eight Thousand Three Hundred Eighty-Nine Dollars (\$1,478,389) in the Traffic Impact Mitigation Fee will fund the projects identified in the 2026-2035 Ten-Year Capital Improvement Plan with anticipated timelines, as approved by the City Council on June 17, 2025. City staff estimates that all of the unexpended funds

described above will be spent within the next ten (10) years on projects identified in the 2026-2035 Ten-Year Capital Improvement Plan.

D. Based on the foregoing, a continuing need has been demonstrated for the fees in the Traffic Impact Mitigation Fund.

Section 9. This Resolution shall become effective immediately upon its passage and adoption.

7/1/2024		Fiscal Year 2025 (July 1 - June 30)				6/30/2025		
Beginning Balance	FY25 Fees Collected	FY25 Interest Earned	Project Title	FY25 Expenditures	Appropriated Funds	Unappropriated Funds	Ending Balance	
<u>In Lieu Underground - 154</u>								
\$1,123,761.45	\$0.00	\$32,514.36						
			9976 - Undergrounding of Utilities Project	\$204.84	\$173,169.12			
			Contractual Services	\$500,000.00				
				\$500,204.84	\$173,169.12	\$482,901.85	\$656,070.97

Attachment B	21

Section 1: Introduction

The Ten-Year Capital Improvement Program (CIP) is a long-term planning tool structured around five (5) two-year cycles. Aligned with the City's vision, it establishes priorities for investments in critical infrastructure projects. The CIP presented in this document covers the ten-year period spanning Fiscal Years 2026 through 2035.

One of the primary responsibilities of local government is the creation and preservation of a community's physical infrastructure including roads and bridges; stormwater systems; public buildings; traffic signals, parks & open space and recreational facilities. Because these require a significant commitment of public resources, planning for capital improvements is a matter of prudent financial management and sound stewardship of the community's infrastructure.

The CIP is a dynamic document that is updated every two years, with the addition of two program years, identifying new projects, and prioritizing all projects. The Engineering Division has developed this update to the CIP with input from City Departments, City Council, Commissions, and the public along with adopted plans.

The projects included in the CIP span several key areas: Asset Management, Parking and Downtown Enhancements, Transportation, Parks and Open Space, and Facilities. A new category—Climate Resilience—has also been added to support the implementation of green infrastructure and initiatives from the City's Sustainability Action Plan. Adopted in July 2023, the Sustainability Action Plan provides a roadmap for Walnut Creek to advance toward a sustainable future and adapt to the impacts of climate change.

Many of the future projects listed are not yet fully funded but are included to highlight the need to identify funding sources—particularly for large, complex projects that currently lack dedicated funding sources. Including these projects is essential for the City's long-term planning efforts and enhances their competitiveness for future grant funding opportunities.

Council's approval of the Ten-Year Capital Improvement Program **DOES NOT** constitute an appropriation of funds to specific projects. The first two years of the CIP are included as part of the Fiscal Years 2026 and 2027 Capital Budget, which have been presented to City Council along with the operating budget for adoption.

Section 2: Program Goals, Objectives, and Guidelines

City of Walnut Creek's Vision

A balanced community meeting tomorrow's needs while protecting the quality and character we value today.

The Capital Improvement Program (CIP) supports the City's Vision by delivering both Asset Management and Discretionary Capital projects that advance the following goals:

- A safe, attractive community
- Protect natural resources and quality neighborhoods
- Safe streets and efficient transportation systems
- Reliable and effective infrastructure

The CIP serves as a policy statement outlining the City's planned capital projects. The primary objectives of maintaining a Capital Improvement Program are:

- Provide increased planning and coordination of capital projects
- Relate the planning of capital projects more effectively to general City goals and the Long-Term Financial Forecast
- Assist City staff in projecting future requirements for personnel and equipment in the development of department programs and the City's operating budget
- Meet the requirements of Federal and State laws and grants
- Identify funding gaps needed to ensure the proper care, improvement, and safety of the City's infrastructure

The following guidelines are considered when including a project within the CIP:

- Does the project preserve an existing asset?
- Will the project mitigate an identified health or safety problem?
- Is the project mandated by State or Federal governments, or a court of law?
- Does the project contribute to the economic health of the community?
- Does the project contribute to the quality of life in the community?
- Are there available funding mechanisms for capital costs as well as ongoing operations and maintenance?

Section 3: Funding Sources

The Capital Improvement Program is supported by multiple funding sources, and the total projected spending by funding source is summarized in Table 1.

General Fund

The General Fund is the unrestricted source of funding for the CIP. To address significant unfunded Asset Management needs, the 2017 Long-Term Financial Forecast (LTFF) update approved by the City Council recommended allocating 2.5% of operating revenue to the Capital Budget. The final allocation for Fiscal Years 2026 and 2027 is \$3.85 million, which is approximately 2% of the total operating budget. This amount is sufficient for keeping existing buildings maintained in their current state, but not enough to support enhancement or to adjust to programming needs. The General Fund allocation for Fiscal Years 2028 through 2035 is expected to remain at around 2% of the total operating revenue.

Roadway Maintenance Fund

Gas Tax Fund is made up of two sources and consolidated in the CIP.

- The **Highway Users Tax Account (HUTA)** is distributed on a per capita basis based on the sale of fuel and the State tax that is assessed on fuel purchases. This fund must be used for research, planning, construction, improvements, maintenance, and operation of public streets and highways (and their related public facilities for non-motorized traffic), including mitigation of their environmental effects, the payment for property taken or damaged for such purpose, and the administrative costs necessarily incurred in the process.
- The Road Repair and Accountability Act of 2017 – Local Streets and Roads Funding, sometimes referred to as Senate Bill 1 (**SB 1**), raised gas and diesel taxes and vehicle license fees with a significant portion of the revenues returned to local municipalities for the maintenance and repair of their roadway network. Similar to HUTA funding, SB 1 funding has specific restrictions, including a *maintenance of effort* requirement that prohibits these new revenues from being used to supplant general or discretionary funds intended for repair and maintenance of the roadway network.

Local Street & Measure J Fund was approved by voters in 1988 and extended in 2004 for an additional 30 years. This Measure collects a half-cent sales tax within Contra Costa County for new transportation-related projects and programs, a portion of which is returned to each local agency. As required under the Local Transportation Authority and Improvement Act, the revenues derived from the sales tax may be expended "for the construction and improvement of state highways, the construction, maintenance,

improvement, and operation of local streets, roads, and highways, and the construction, improvement, and operation of public transit systems."

Downtown Parking and Enhancement Enterprise Fund

The creation of a separate Downtown Parking and Enhancement Enterprise Fund has allowed the City to reinvest parking revenues into the maintenance of parking-related facilities and enhancements to the downtown. Although these funds are general in purpose and could be used for any need, Council has set a policy stating that these funds are for the administration, maintenance, and construction of parking facilities and downtown enhancements. The Downtown Parking and Enhancement Enterprise Fund contributes \$700,000 annually to the CIP, with no additional allocation for capital projects.

Developer Fees

- **Traffic Impact Mitigation Fee** funding comes from fees collected from developers to offset the cumulative effect of new development on the City's transportation system. It serves as the primary funding source for transportation improvements within the City.
- **In-Lieu Parkland Dedication Fee** funding is collected from residential developers based on the additional population generated by the development and the value of the property. It is used exclusively for park-related capital improvement projects, including the development or rehabilitation of parks and recreational facilities. In recognition of deferred maintenance, a portion of these funds is allocated each two-year cycle to rehabilitate or replace existing amenities within the City's parks and open space.

Measure O

Measure O is a half-cent transaction and use tax that began in April 2023 and is scheduled to sunset in April 2033. Measure O is projected to generate approximately \$12 million in revenue annually. The Fiscal Years 2026 and 2027 Capital Budget proposes allocating \$22.25 million of Measure O funds toward the construction of the new Aquatic Facility and Community Center at Heather Farm Park.

Bond Financing through Measure O Sales Tax

The remaining \$45.75 million needed for the Aquatic Facility and Community Center at Heather Farm Park is proposed to be funded through bond financing, backed by future revenues from Measure O. The bond financing will be partially offset by \$3.0 million in pledged donations from Walnut Creek Aquatics, to be contributed over a 10-year period.

Grants and Other Contributions

Grant funds are revenues received from external agencies, typically through Federal and State grant programs. Other revenue sources include private contributions. These funds are separate from the General Fund and Special Revenue Funds and are used exclusively for capital projects within the Capital Improvement Program. Current grant and other funding sources include the following:

- **Federal Community Benefit Funding Grant:** Congressman DeSaulnier, representing the 10th District, has secured \$1.23 million to implement safety improvements and repave Ygnacio Valley Road from Oak Grove to the Walnut Creek city limit with the City of Concord.
- **Federal Highway Bridge Program (HBP):** The City of Walnut Creek received a grant of \$8.8 million for the replacement of the South Main Street bridge over Las Trampas Creek.
- **Affordable Housing and Sustainable Communities (AHSC):** The developer of 699 Ygnacio Valley Road (Civic Crossing) was awarded an AHSC grant. A portion of this grant, totaling \$2.46 million, will be directed to the City to fund transportation improvements.
- **Federal Highway Safety Improvement Program (HSIP):** The City of Walnut Creek was awarded a \$1.9 million HSIP grant for safety improvements at selected intersections along Ygnacio Valley Road.
- **Traffic Mitigation:** The City received \$1.75 million toward traffic mitigation from “The Glen” development located in Contra Costa County.
- **Private Contributions:** Contributions from community groups, citizens, and businesses are increasingly supporting funding for many of the City’s discretionary projects. Notably, Walnut Creek Aquatics has committed \$3 million over 10 years toward the Heather Farm Park Aquatics and Community Center, as reflected in the FY 2026 and FY 2027 Capital Budget.

Table 1: Projected 2026-2035 CIP Spending by Funding Source

Funding Source	Funding Amount
General Fund	\$19,905,000
Gas Tax	\$30,100,000
Measure J	\$11,200,000
Downtown Parking & Enhancement	\$3,500,000
Traffic Impact Mitigation Fee	\$3,940,000
In-Lieu Parkland Dedication	\$4,150,000
Grants	\$16,525,383
Measure O	\$22,500,000
Other Revenue	\$57,500,000
Ten-Year Total Funded Projects	\$169,320,383

Section 4: Project Categories

The Capital Improvement projects proposed for the next ten years are categorized into Asset Management Projects and five types of Discretionary projects: Downtown Parking and Enhancement, Transportation, Parks and Open Space, Climate Resilience, and Facility. The order-of-magnitude cost estimates developed for all capital projects are summarized by project category in Figure 1 and Table 2. The anticipated total cost for the 2026-2035 Ten-Year Capital Improvement Program is \$245.7 million.

Figure 1: CIP Needs by Two-Year Cycle and Project Category

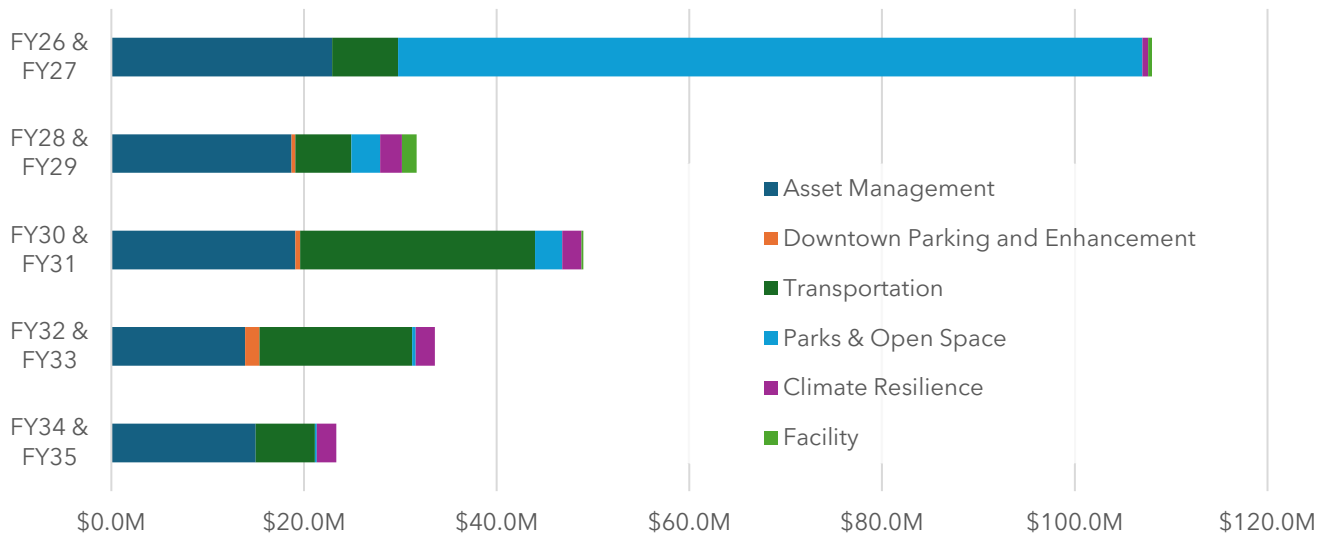

Table 2: CIP Needs by Two-Year Cycle and Project Category

Fiscal Year	Asset Management	Downtown Parking & Enhancement	Transportation	Parks & Open Space	Climate Resilience	Facility	Grand Total
	Non-Discretionary	Discretionary	Discretionary	Discretionary	Discretionary	Discretionary	
26 & 27	\$22.9M	\$0.0M	\$6.8M	\$77.3M	\$0.6M	\$0.4M	\$108.0M
28 & 29	\$18.7M	\$0.4M	\$5.8M	\$3.0M	\$2.3M	\$1.5M	\$31.7M
30 & 31	\$19.1M	\$0.5M	\$24.4M	\$2.8M	\$2.0M	\$0.2M	\$49.0M
32 & 33	\$13.9M	\$1.5M	\$15.9M	\$0.4M	\$2.0M	\$0.0M	\$33.6M
34 & 35	\$15.0M	\$0.0M	\$6.2M	\$0.2M	\$2.0M	\$0.0M	\$23.4M
Ten-Year Total	\$89.6M	\$2.4M	\$59.0M	\$83.6M	\$8.9M	\$2.1M	\$245.7M

Note: Downtown Parking and Enhancement Asset Management projects included as part of Asset Management Subtotal

The funding total of \$245.7 million includes the unfunded amounts shown in Table 3. Detail of the unfunded amounts, project categories, and projects are described in Section 6: Capital Improvement Program Details, Attachment A, and Attachment B.

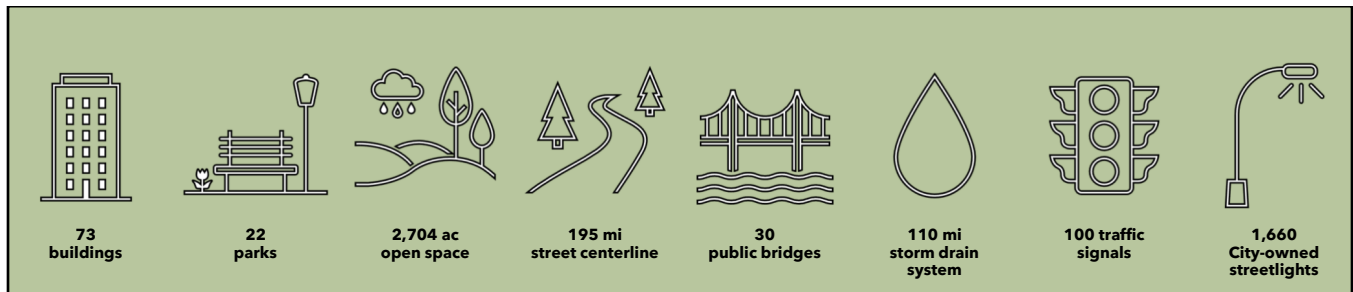

Table 3: 2026-2035 CIP Unfunded Needs by Project Category

Project Category	Unfunded Amount
Unfunded Asset Management Projects	\$11,250,000
Unfunded Downtown Parking & Enhancement	\$2,400,000
Unfunded Transportation	\$48,863,450
Unfunded Parks, Rec & Open Space	\$6,343,000
Unfunded Climate Resilience	\$5,750,000
Unfunded Facility	\$1,725,000
Ten-Year Total Unfunded Projects	\$76,331,450

Asset Management Projects

Asset management projects preserve the value of the City's prior capital investments, providing long-term programmed maintenance of City infrastructure and facilities. Figure 2 offers a non-exhaustive overview of the City's assets.

Figure 2: City Assets

Proper preservation of the City's existing assets is a priority, as maintaining these significant investments ensures the continued delivery of community programs and generates long-term cost savings.

Existing asset management projects funded by the CIP are differentiated from regular maintenance projects funded by the City's operating budget by the cost and the lifespan of the improvements. A summary comparing Asset Management projects and Maintenance projects is provided in Table 4.

Table 4: Asset Management vs. Maintenance Projects

Asset Management	Maintenance
Funded by Capital Improvement Program	Funded by City's Operating Budget
Cost > \$30,000	Cost < \$30,000
Included in long-term Maintenance Master Plan	Short-term
Life expectancy > 5 years	

Asset Management Categories

Asset management projects are divided into the following nine sub-categories:

- Roadway & Bridge Maintenance
- Storm Drain Repairs
- Building/Facility Maintenance
- Building/Facility Renovation and Replacement
- Parking Lot Maintenance
- Parks, Open Spaces and Trails
- Curb, Gutter, and Sidewalks
- Signal and Streetlight Maintenance
- Parking Facility and Downtown Maintenance

Roadway & Bridge Maintenance: This sub-category is included within the City's overall pavement management program. These projects are typically funded by a combination of Gas Tax, Measure J funds, and grants.

Storm Drain Repairs: This program is managed by the street maintenance division and is based upon annual storm drain inspections to assess and prioritize the needs of the system.

Building/Facility Maintenance: Projects are guided by the Municipal Maintenance Master Plan (MMP), which provides a long-term schedule for maintaining and replacing major components such as roofs; heating, ventilation, and air conditioning (HVAC) systems; and flooring.

Building/Facility Renovation and Replacement: These projects address the need for major investments in existing facilities that are in poor condition and require more extensive work than routine maintenance. Because they preserve the facility's core function without altering its basic characteristics, these projects fall under the Asset Management category.

Curb, Gutter, and Sidewalk: Improvements are managed by the Street Maintenance Division of the Public Works Department, based on routine inspections used to assess and prioritize infrastructure needs. Projects also focus on mitigating trip hazards and addressing accessibility concerns.

Parking Lot Maintenance: The City maintains 30 surface parking lots serving City-owned facilities and two public metered surface lots. The City's MMP outlines the long-term schedule for maintenance and replacement of key elements, such as paving.

Parks, Open Space, and Trails: Projects are coordinated with the Parks and Open Space Division and Engineering Division staff to ensure appropriate improvements are included in each two-year CIP cycle. Elements covered include irrigation systems, turf, court and playground surfacing, playground equipment, and other park amenities. Trail conditions are evaluated City-wide, and maintenance is prioritized based on need.

Signal and Streetlight Maintenance: Guided by a master plan managed by the Traffic Maintenance Division, these projects involve the scheduled maintenance and replacement of traffic signal components such as cabinets, controllers, detection and communication systems, wiring, and signal heads. City-owned streetlights are also included in this program.

Parking/ Facility and Downtown Maintenance: These projects are managed separately from general building and facility maintenance due to their dedicated funding source—the Downtown Parking and Enhancement Enterprise Fund. The MMP guides long-term maintenance and replacement of parking garage components. Downtown maintenance projects include street tree replacement and the installation or replacement of streetscape furniture.

Discretionary Capital Projects

Discretionary capital projects involve the creation of new City assets or substantial improvements to existing infrastructure, including major renovations. These projects are defined by specific criteria: a minimum cost of \$50,000, a useful life of at least 20 years, and land acquisitions either through fee title or development rights, involving areas greater than 0.5 acre or costs exceeding \$250,000.

Parking and Downtown Enhancement is a stand-alone category due to the separate and targeted Downtown Parking and Enhancement Enterprise Fund. The category includes both asset management and discretionary projects for the garage and parking equipment as well as downtown enhancement projects intended to reinvest parking revenues from the public into the downtown experience.

Transportation Projects may include street construction or reconstruction, traffic safety enhancements, traffic management improvements, signal upgrades, pedestrian accessibility improvements, and bicycle facility enhancements. While some funding may come from Measure J return-to-source funds, the primary sources of anticipated funding are Traffic

Impact Fees and potential grants. The City's Traffic Impact Fee Eligible Project List, which outlines a 30-year horizon of potential transportation improvements, serves as a key reference for identifying and prioritizing these projects.

Parks and Open Space Projects included in the Ten-Year Capital Improvement Program (CIP) are guided by the recently completed 2025 Parks Vision Plan, which was developed in response to the City's continued growth and the need to evaluate and recommend enhancements to parks and recreational amenities. Many of the projects identified in the Vision Plan are incorporated into the CIP. Funding for park and open space projects is anticipated to come from multiple sources, with the majority provided by In-Lieu Parkland Dedication Fees and Measure O.

Climate Resilience Projects in the Ten-Year Capital Improvement Program support the implementation of the City's Sustainable Action Plan and Green Infrastructure objectives:

- **Sustainability Action Plan** efforts include researching and applying for grants, as well as identifying matching funds to maximize project funding opportunities. Projects may include energy efficiency and conservation upgrades and installation of electric vehicle (EV) charging infrastructure
- **Green Infrastructure Improvements** aim to reduce pollutants in stormwater runoff at the source, before it enters the storm drain system. These improvements are mandated by the Regional Water Quality Control Board to help manage and treat urban drainage runoff, supporting regional water quality goals.

Facility Projects represent a significant portion of the City's assets, as many community-serving structures require attention. These facilities currently lack a consistent, dedicated funding source for program-related initiatives. This category has been added to the Capital Improvement Program to provide the City Council and community with a clear understanding of needs beyond routine maintenance. Typical discretionary facility projects include those that support various program activities or offer enhancements to respond to evolving community needs and environmental conditions.

Section 5: Highlighted Projects

The Fiscal Years 2026 through 2035 Capital Improvement Program includes many essential and impactful projects. The following projects are expected to have significant long-term benefits for the City of Walnut Creek.

Asset Management: Buildings and Facilities

The City maintains 73 buildings across 34 facilities throughout Walnut Creek. Many of these buildings are approaching fifty years of age and require significant maintenance and renovation. Projects include interior and exterior building maintenance, mechanical, electrical, and plumbing system repairs and replacements, as well as reroofing. These investments will enhance the appearance of the facilities and extend their useful life, supporting programs that contribute to the City's economic health and quality of life.

Asset Management: Roadway Maintenance

The City-wide roadway network comprises 195 miles of streets and represents the City's most valuable asset. To maximize the lifespan of this network, the City employs a combination of street slurry seals, cape seals, and major roadway reconstruction projects. A pavement evaluation completed in February 2025 found the City's overall Pavement Condition Index (PCI) remains between 69 and 72.

South Main Street Bridge Replacement

The South Main Street Bridge over Las Trampas Creek, originally constructed in 1919, is part of the Federal Bridge Inventory. It is listed as functionally obsolete and eligible for replacement under the Federal Highway Bridge Program. The City is collaborating with Caltrans to complete the design and secure the necessary right-of-way and utility relocations for the bridge replacement. The Highway Bridge Program is estimated to fund 88.53% of the total \$8.8 million replacement cost.

Storm Drain Maintenance and Green Infrastructure

In response to increased intensity of storm events in recent years, the City will prioritize maintaining a more resilient storm drainage system. Planned projects include storm drain maintenance, repair and replacement of aging storm drain infrastructure, and investigations to map damaged storm drain facilities.

Parking Garage Maintenance

The City's three parking garages, offering over 800 parking spaces, are vital assets supporting downtown businesses and retailers. The establishment of a dedicated Downtown Parking and Enhancement Enterprise Fund has enabled the City to reinvest parking revenues into essential maintenance for these facilities. Key projects in the CIP include the installation of new and upgraded parking management systems and enhanced security measures.

Traffic Safety Improvements

Transportation projects in the CIP are built upon the "Complete Streets" and "Safe System Approach" principles, addressing all modes of transportation, including pedestrians, bicycles, automobiles, and buses. Many proposed projects focus on improving roadway safety as well as enhancing pedestrian and bicycle facilities. Grant funding and development-related fees will support traffic safety improvements on Ygnacio Valley Road, Marchbanks Drive, and San Miguel Drive. Additionally, an Affordable Housing and Sustainable Communities grant will fund projects that add or enhance pedestrian and bicycle infrastructure.

Heather Farm Park Aquatic and Community Center

The Heather Farm Park Aquatic and Community Center project will advance to final design and construction. This project will replace the aging Heather Farm Park Community Center and Clarke Swim Center with a modern aquatics facility and community center, featuring flexible indoor and outdoor multi-use spaces, an appropriately sized pool, and supportive amenities, while continuing to accommodate existing programs. Additionally, the CIP includes a future project to evaluate and determine the optimal use of the Clarke Swim Center and Pool House, to be implemented following the completion of the Heather Farm Park Aquatic and Community Center.

Section 6: Capital Improvement Program Details

The list of proposed Asset Management and Discretionary Capital projects by two-year cycle and by fund is provided in the Fiscal Years 2026 through 2035 Capital Improvement Program Project Detail sheets in Attachment A.

Detailed information on individual projects is presented in the Project Description Worksheets provided in the Fiscal Years 2026 through 2035 Capital Improvement Program Project Description Worksheets in Attachment B. Attachment B

Attachment A

Fiscal Years 2026 through 2035 Capital Improvement Program Project Detail

FISCAL YEAR 2026 AND FISCAL YEAR 2027

Project Title	Project Cost Estimate	General Fund	Roadway Funding		Downtown Parking Fund	Developer Fees		Grants	Measure "O"	Other Revenue Measure "O" Financed, Assessed Prop., Encroachment, etc.	UNFUNDED NEEDS

Attachment B

Fiscal Years 2026 through 2035 Capital Improvement Program Project Description Worksheets

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

ROADWAY MAINTENANCE

PROJECT CATEGORY: Asset Management

REQUESTING PARTY: Public Works

FUNDING SOURCE: Gas Tax, Measure J, Grants

PROJECT DESCRIPTION AND JUSTIFICATION:

The City's Pavement Management Program includes street slurry and cape seal projects; residential asphalt overlay projects and major roadway reconstruction projects. The Pavement Management needs are partially offset by the efforts of the City's Street Maintenance Division.

PROJECT STATUS:

Continuous - The City has an annual paving and maintenance program.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate	\$7,935	\$6,700	\$6,700	\$6,700	\$6,700	\$34,735
Funding Sources						
General Fund	\$200	\$200	\$200	\$200	\$200	\$1,000
Gas Tax (HUTA & RMRA)	\$4,800	\$4,800	\$4,800	\$4,800	\$4,800	\$24,000
Measure J	\$1,700	\$1,700	\$1,700	\$1,700	\$1,700	\$8,500
Grant	\$1,235					
Unfunded Needs	\$0	\$0	\$0	\$0	\$0	\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Timely implementation of programmed street maintenance will prevent more costly repairs in the future.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

BRIDGE MAINTENANCE AND REPAIRS

PROJECT CATEGORY: Asset Management

REQUESTING PARTY: Public Works

FUNDING SOURCE: Measure J, Grants

PROJECT DESCRIPTION AND JUSTIFICATION:

The City of Walnut Creek is responsible for the maintenance and operation of 26 vehicular bridges. Bridge Maintenance and Repair projects are guided by the Bridge Preventive Maintenance Plan (BPMP), which prioritizes activities in alignment with the Federal Highway Bridge Program (HBP) guidelines. Upcoming bridge repair and rehabilitation projects—scheduled for inclusion in the FY 2026–2035 Capital Improvement Program—are anticipated at Castle Hill Road, South Main Street, and Bancroft Road. The Castle Hill Road bridge underwent a strengthening project completed in 2024, which extended its service life by an estimated five years. However, the eventual replacement of this bridge is not eligible for funding through the HBP and currently remains unfunded.

PROJECT STATUS:

Continuous - The City has an annual bridge maintenance program.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate	\$9,500	\$2,500	\$3,900	\$500	\$500	\$16,900
Funding Sources						
Measure J	\$700	\$500	\$500	\$500	\$500	\$2,700
HBP Grant	\$8,800	\$2,000				\$10,800
Unfunded Needs	\$0	\$0	(\$3,400)	\$0	\$0	(\$3,400)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Timely implementation of programmed street maintenance will prevent more costly repairs in the future.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

STORM DRAIN INSPECTION AND REPAIRS

PROJECT CATEGORY: Asset Management

REQUESTING PARTY: Public Works

FUNDING SOURCE: General Fund (Maintenance), Gas Tax

PROJECT DESCRIPTION AND JUSTIFICATION:

The City maintains approximately 110 miles of storm drain system. This funding provides for repairs to the City's storm drain infrastructure as identified by the City Maintenance and Engineering divisions. The funding will also provide for contractor performed inspections with CCTV and cleaning of the inspected pipes. This project is a proactive approach toward replacing aging and compromised infrastructure including monitoring of the approximately 3.5 miles of corrugated metal pipes (CMP) in the storm drain system.

PROJECT STATUS:

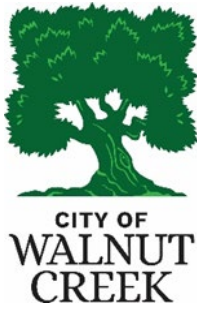

Continuous. The City has an ongoing program to complete minor storm drain repairs and replacements.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate	\$1,000	\$1,000	\$1,000	\$1,000	\$1,100	\$5,100
Funding Sources						
General Fund	\$200	\$200	\$200	\$200	\$200	\$1,000
Gas Tax	\$800	\$800	\$800	\$800	\$900	\$4,100
Measure J						
Unfunded Needs	\$0	\$0	\$0	\$0	\$0	\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Timely implementation of storm drain maintenance will prevent more costly repairs in the future.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

BUILDING/FACILITY MAINTENANCE

PROJECT CATEGORY: Asset Management

REQUESTING PARTY: Public Works

FUNDING SOURCE: General Fund (Maintenance)

PROJECT DESCRIPTION AND JUSTIFICATION:

The City maintains 73 buildings of various sizes and containing varying types of equipment. The City's Municipal Maintenance Master Plan (MMP) provides a schedule for the long-term maintenance/replacement of major building elements such as roofs; heating, ventilation, and air conditioning (HVAC) systems; and flooring. Elements may include sustainability improvements that will reduce greenhouse gas emissions from City facilities. The engineering division coordinates with the building maintenance division staff to periodically review and update the MMP and confirm the appropriate projects to be included in each two-year cycle of the CIP.

PROJECT STATUS:

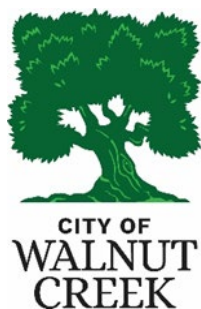

Continuous

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate	\$2,205	\$4,500	\$4,000	\$3,000	\$2,500	\$16,205
Funding Sources						
General Fund	\$2,205	\$2,400	\$2,350	\$2,500	\$2,500	\$11,955
Unfunded Needs	\$0	(\$2,100)	(\$1,650)	(\$500)	\$0	(\$4,250)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Timely implementation of building and equipment maintenance will prevent more costly repairs in the future.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

PARKING LOT MAINTENANCE

PROJECT CATEGORY: Asset Management

REQUESTING PARTY: Public Works

FUNDING SOURCE: General Fund (Maintenance)

PROJECT DESCRIPTION AND JUSTIFICATION:

The City maintains 30 parking lots serving City owned facilities and 2 surface parking lots with meters. The City's Municipal Maintenance Master Plan (MMP) provides a schedule for the long-term maintenance/replacement of major elements such as paving. The engineering division coordinates with the street maintenance division staff to periodically review and update the MMP and confirm the appropriate projects to be included in each two-year cycle of the CIP.

PROJECT STATUS:

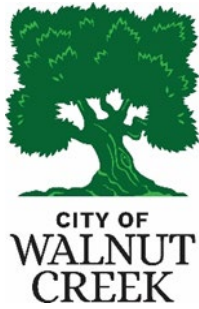

Continuous

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate	\$50	\$50	\$50	\$50	\$50	\$250
Funding Sources						
General Fund	\$50	\$50	\$50	\$50	\$50	\$250
Unfunded Needs	\$0	\$0	\$0	\$0	\$0	\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Timely implementation of parking lot maintenance will prevent more costly repairs in the future.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

PARKS, OPEN SPACE AND TRAILS MAINTENANCE

PROJECT CATEGORY: Asset Management

REQUESTING PARTY: Public Works

FUNDING SOURCE: General Fund (Maintenance), In-Lieu Parkland Fund

PROJECT DESCRIPTION AND JUSTIFICATION:

The City maintains 22 parks and 5 designated open space areas. The City's Municipal Maintenance Master Plan (MMP) provides a schedule for the long-term maintenance/replacement of playground structures, fencing, trails, signage, roadway medians, sport court surfacing, irrigation, turf and other improvements. Elements may include sustainability improvements that will reduce water usage. Open space infrastructure includes the grazing program, preserving the stock ponds, signage and trail markings and restoring various areas throughout the open space.

PROJECT STATUS:

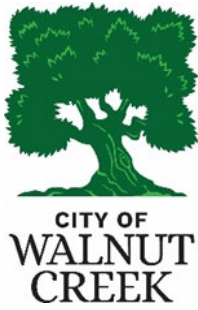

Continuous

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate	\$750	\$1,150	\$1,150	\$1,150	\$1,150	\$5,350
Funding Sources						
General Fund	\$200	\$250	\$250	\$250	\$250	\$1,200
In-Lieu Parkland Fund	\$550	\$900	\$900	\$900	\$900	\$4,150
Unfunded Needs	\$0	\$0	\$0	\$0	\$0	\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Timely implementation of equipment maintenance will prevent more costly repairs in the future.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

CURB, GUTTER AND SIDEWALK MAINTENANCE

PROJECT CATEGORY: Asset Management

REQUESTING PARTY: Public Works

FUNDING SOURCE: Gas Tax, General Fund (Maintenance)

PROJECT DESCRIPTION AND JUSTIFICATION:

The City maintains 195 miles of streets within city limits most of which are improved with curb, gutter, and sidewalk. The City's ADA Transition Plan identifies existing non-compliant curb ramps within the Core Area and helps prioritize the replacement of these ramps.

PROJECT STATUS:

Continuous

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate	\$550	\$550	\$550	\$550	\$550	\$2,750
Funding Sources						
General Fund	\$350	\$350	\$350	\$350	\$350	\$1,750
Gas Tax	\$200	\$200	\$200	\$200	\$200	\$1,000
Unfunded Needs	\$0	\$0	\$0	\$0	\$0	\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Timely implementation of curb gutter and sidewalk maintenance will prevent more costly repairs in the future and limit City liability for trip and fall claims.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

SIGNAL/STREETLIGHT MAINTENANCE PROJECTS

PROJECT CATEGORY: Asset Management

REQUESTING PARTY: Public Works

FUNDING SOURCE: General Fund (Maintenance)

PROJECT DESCRIPTION AND JUSTIFICATION:

The City maintains 100 traffic signals and 1,660 City-owned street lights. Signal and streetlight maintenance projects are included in a master plan managed by the traffic maintenance division. This master plan identifies scheduled maintenance/replacement of signal elements such as cabinets, controllers, wiring, and signal heads at each of the City's traffic signals and City-owned streetlights.

PROJECT STATUS:

Continuous

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate	\$250	\$250	\$250	\$250	\$250	\$1,250
Funding Sources						
General Fund	\$250	\$250	\$250	\$250	\$250	\$1,250
Unfunded Needs	\$0	\$0	\$0	\$0	\$0	\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Timely implementation of signal and streetlight equipment maintenance will prevent more costly repairs in the future.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

PARKING FACILITY PROJECTS

PROJECT CATEGORY: Parking and Downtown Enhancement

REQUESTING PARTY: Public Works, Administrative Services

FUNDING SOURCE: Downtown Parking Fund

PROJECT DESCRIPTION AND JUSTIFICATION:

Projects to extend the operational life of the downtown parking garages. Projects would include:

- elevator renovations
- painting
- repairs & assessments
- parking security upgrades
- deck sealing
- other associated garage work

PROJECT STATUS:

Continuous

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate	\$700	\$600	\$600	\$600	\$600	\$3,100
Funding Sources						
Downtown Parking Fund	\$700	\$600	\$600	\$600	\$600	\$3,100
Unfunded Needs	\$0	\$0	\$0	\$0	\$0	\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Timely implementation of programmed maintenance and repairs will prevent more costly repairs in the future.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

DOWNTOWN MAINTENANCE

PROJECT CATEGORY: Parking and Downtown Enhancement

REQUESTING PARTY: Public Works, Administrative Services

FUNDING SOURCE: Downtown Parking Fund

PROJECT DESCRIPTION AND JUSTIFICATION:

Projects to maintain and extend the operational life of the downtown outdoor features. Projects would include:

- parking meter replacement
- replacement of the tivoli lighting
- decorative crosswalks
- sidewalk improvements and enhancements
- install downtown furniture
- tree replacement
- sidewalk repairs

PROJECT STATUS:

Continuous

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate	\$0	\$100	\$100	\$100	\$100	\$400
Funding Sources						
Downtown Parking Fund	\$0	\$100	\$100	\$100	\$100	\$400
Unfunded Needs	\$0	\$0	\$0	\$0	\$0	\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Timely implementation of programmed maintenance will prevent more costly repairs in the future.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

HEATHER FARM PARK RESILIENT PLAYGROUND SURFACE REPLACEMENT

PROJECT CATEGORY: Asset Management

REQUESTING PARTY: Public Works

FUNDING SOURCE: Unfunded

PROJECT DESCRIPTION AND JUSTIFICATION:

The All-Abilities Playground at Heather Farm is popular and provide access for all children. The playground was completed in 2014 and since then has seen approximately 200,000 visitors. The use is as expected and the playground surfaces are beginning to show wear that cannot be spot repaired. This project would perform a major renovation to the playground surfacing to provide for an additional 8-10 years of use.

PROJECT STATUS:

Not Started

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate		\$1,000				\$1,000
Funding Sources						
Fund		\$0				\$0
Unfunded Needs		(\$1,000)				(\$1,000)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

No increase or reduction in maintenance costs.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

PARK IRRIGATION RESERVOIR LINER, PUMPS AND HF POND AERATION FOUNTAINS

PROJECT CATEGORY: Asset Management

REQUESTING PARTY: Public Works

FUNDING SOURCE: Unfunded

PROJECT DESCRIPTION AND JUSTIFICATION:

The Irrigation Pumps from the Irrigation Pond were replaced in 2007 and have an expected service life of approximately 10 years. The Pond Aeration Fountains were installed in 2005 and like the pumps, have an approximate life of 10 years. Project cost is based on the previous cost for both projects. Specific projects could include:

- Irrigation Pond repair to save the \$30k/yr lost due to leakage
- Pathway and internal street lighting update for \$300,000
- HFP irrigation pump replacement and Pond Aeration system replacement at \$800,000

PROJECT STATUS:

Not Started

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate		\$300	\$800			\$1,100
Funding Sources						
Fund		\$0	\$0			
Unfunded Needs		(\$300)	(\$800)			(\$1,100)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

No increase or reduction in maintenance costs.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

BALL FIELD SYNTHETIC TURF REPLACEMENT

PROJECT CATEGORY: Asset Management

REQUESTING PARTY: Public Works

FUNDING SOURCE: Unfunded

PROJECT DESCRIPTION AND JUSTIFICATION:

The synthetic turf fields 1 and 2 at Heather Farm Park are planned for construction in FY25. Heavy use is expected as the turf will allow additional programmed play time. Synthetic turf are typically replaced every 8 to 10 years. This project would perform a major renovation to the synthetic turf to provide for an additional 8-10 years of use.

PROJECT STATUS:

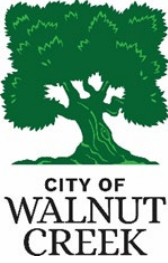

Not Started

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate					\$1,500	\$1,500
Funding Sources						
Fund					\$0	\$0
Unfunded Needs					(\$1,500)	(\$1,500)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Timely implementation of programmed maintenance and repairs will prevent more costly repairs in the future.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

PEDESTRIAN IMPROVEMENTS: NON SIGNALIZED CROSSWALKS

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Traffic Impact Fee (TIF Project #4)

PROJECT DESCRIPTION AND JUSTIFICATION:

Recognizing the importance of pedestrian safety, this project maintains an effort to continuously improve uncontrolled pedestrian crosswalks throughout the City. Improvements may include curb ramps, bulb-outs, refuge islands, signing, striping, lighting, line of sight, advanced warning, layout and alignment modifications. An internal process and associated inventory of unsignalized crosswalks, which is updated annually, is used to prioritize upgrades. While most minor signing and striping upgrades will be completed within the Public Works Department's operational budget, locations requiring greater capital expenditures would leverage these funds or may be used as a local match for grant funding.

PROJECT STATUS:

These funds may be accumulated from CIP cycle to cycle should the need arise for a project exceeding the cycle allotment.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate		\$100	\$200	\$200	\$200	\$700
Funding Sources						
Traffic Impact Fee		\$100	\$200	\$200	\$200	\$700
Unfunded Needs		\$0	\$0	\$0	\$0	\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor increase in costs for electricity and maintenance of any lighting improvements, otherwise, no significant change

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

BIKE FACILITIES

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Traffic Impact Fee (TIF Project #2)

PROJECT DESCRIPTION AND JUSTIFICATION:

Bike Facility projects would be implemented based on the Bike Master Plan (BMP), Specific Plans, Local Roadway Safety Plan, Rethinking Mobility Plan, Sustainability Action Plan, community input, and the latest guidelines, design requirements and best practices to select and implement context-appropriate bicycle facilities, amenities, and parking. Installation of bicycle infrastructure that adds lane miles and/or enhances existing facilities and supportive bicycle amenities and parking aligns with the City's traffic safety, multimodal, sustainability, and economic vitality goals. The new bicycle facilities and amenities are eligible for TIF funding as the increased bicycle use reduces the demand for peak hour vehicular trips. This category is ongoing as bike facilities continue to be installed and/or enhanced. The prioritization of capital projects will be established through guidance from the Transportation Commission serving as the City's bicycle advisory committee, grant funding opportunities, and the public.

PROJECT STATUS:

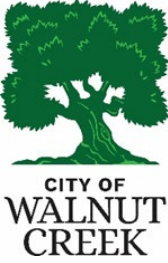

These funds may be accumulated from each CIP cycle should the need arise for a project exceeding the cycle allotment.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate		\$150	\$150	\$150	\$150	\$600
Funding Sources						
Traffic Impact Fee		\$150	\$150	\$150	\$150	\$600
Unfunded Needs		\$0	\$0	\$0	\$0	\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor increase in maintenance costs for new infrastructure.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

SCHOOL AREA ACTIVE TRANSPORTATION

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Traffic Impact Fee

PROJECT DESCRIPTION AND JUSTIFICATION:

Staff receives many requests for active transportation improvements around school areas and along routes to school. The Safe Routes to School study provides recommendations to improve safety for vulnerable school-aged pedestrians. Funds would be spent on design and construction of quick-build active transportation projects that also double as traffic calming improvements. This project is funded through Traffic Impact Fees as it would provide more comfortable facilities for school children to get to school outside of a vehicle, thereby reducing congestion. Priority locations will be determined through the Safe Routes to School study, unsignalized crosswalk priority list, and Local Roadway Safety Plan.

PROJECT STATUS:

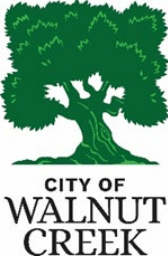

These funds may be accumulated from each CIP cycle should the need arise for a project exceeding the cycle allotment.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate		\$75	\$125	\$125	\$125	\$450
Funding Sources						
Traffic Impact Fee		\$75	\$125	\$125	\$125	\$450
Unfunded Needs		\$0	\$0	\$0	\$0	\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor increase in costs for maintenance of any new infrastructure.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

CITY WIDE TRAFFIC CALMING

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Traffic Impact Fee

PROJECT DESCRIPTION AND JUSTIFICATION:

Staff receives many requests for traffic calming improvements, especially on residential streets. These requests are being organized under the Neighborhood Streets Program, which seeks community feedback to identify traffic safety concerns. Funds would be spent on the design and construction of quick-build improvements and educational materials. This project would be funded through Traffic Impact Fees as traffic calming results in more comfortable infrastructure for pedestrians and bicyclists, thereby reducing vehicle congestion.

PROJECT STATUS:

These funds may be accumulated from each CIP cycle should the need arise for a project exceeding the cycle allotment.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate		\$75	\$125	\$125	\$125	\$450
Funding Sources						
Traffic Impact Fee		\$75	\$125	\$125	\$125	\$450
Unfunded Needs		\$0	\$0	\$0	\$0	\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor increase in costs for maintenance of any new infrastructure.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

LOCAL ROAD SAFETY

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Traffic Impact Fee

PROJECT DESCRIPTION AND JUSTIFICATION:

The Local Roadway Safety project would fund planning, design, and construction of improvements that reduce or eliminate severe injury and fatal collisions. Funds may be used as a local match for federal, state and local grants.

PROJECT STATUS:

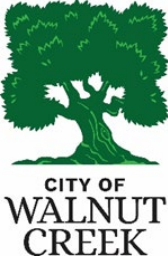

These funds may be accumulated from each CIP cycle should the need arise for a project exceeding the cycle allotment.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate		\$250	\$250	\$250	\$250	\$1,000
Funding Sources						
Traffic Impact Fee		\$250	\$250	\$250	\$250	\$1,000
Unfunded Needs		\$0	\$0	\$0	\$0	\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor increase in costs for maintenance of any new infrastructure.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

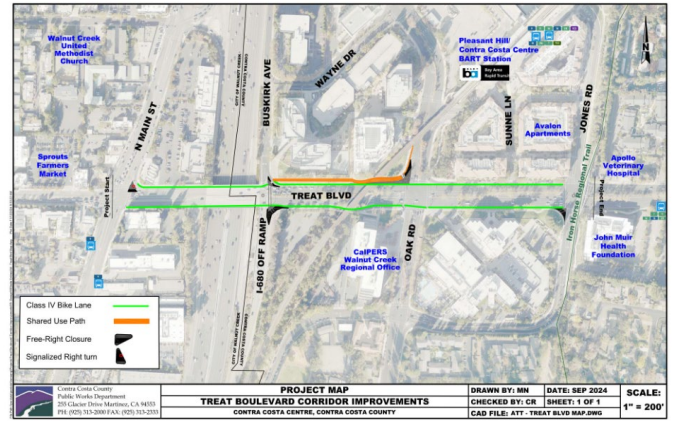

TREAT BOULEVARD CORRIDOR IMPROVEMENTS

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Unfunded

PROJECT DESCRIPTION AND JUSTIFICATION:

Participation with Contra Costa County to construct bicycle infrastructure and pedestrian enhancements along the Treat Boulevard Corridor from N Main Street to Jones Road. Improvements include reconfiguring traffic lanes to establish buffered bicycle lanes separated from vehicular traffic. The project will help improve the safety and comfort of pedestrians and bicyclists with improved passageways, and modified traffic signal timing optimizing vehicular traffic flow while incorporating pedestrians and bicyclists.

PROJECT STATUS:

CCTA is seeking grant funding for the project

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate		\$1,317				\$1,317
Funding Sources						
Traffic Impact Fee		\$0				\$0
Grant (TFCA)		\$104				\$104
Unfunded Needs		(\$1,213)				(\$1,213)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor increase in maintenance costs for new infrastructure

2024 - 2033 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

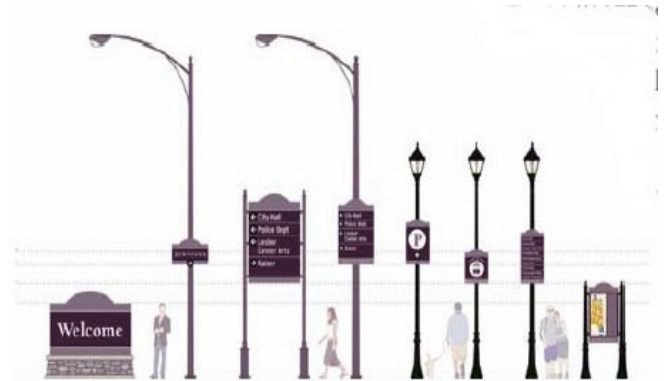

WAYFINDING AND PARKING SIGNAGE

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Traffic Impact Fee (TIF Project #33)

PROJECT DESCRIPTION AND JUSTIFICATION:

Implement strategies from Rethinking Mobility that are focused on wayfinding signage for pedestrians and bicyclists, and new parking signage for improved curb management.

PROJECT STATUS:

Not Started.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate		\$50				\$50
Funding Sources						
Traffic Impact Fee		\$50				\$50
Unfunded Needs		\$0				\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor increase in costs for maintenance of any new infrastructure.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

TRAFFIC SIGNAL AT TREAT & ARKELL

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Unfunded

PROJECT DESCRIPTION AND JUSTIFICATION:

Install a traffic signal at the intersection of Treat Boulevard and Arkell Road. This intersection provides access to neighborhoods and a school, and additional traffic control devices may be warranted in order to facilitate more efficient and safer access for vehicles, pedestrians and bicycles. The project will include assessing appropriate traffic control at the intersection, including alternatives to a fully signalized intersection, design, and construction.

PROJECT STATUS:

Not started. Potential grant funding may come through Innovate 680.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate		\$900				\$900
Funding Sources						
Traffic Impact Fee		\$0				\$0
Unfunded Needs		(\$900)				(\$900)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor increase in costs for electricity and maintenance of any lighting improvements, otherwise, no significant change

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

OLYMPIC CORRIDOR TRAIL CONNECTOR STUDY AND IMPROVEMENTS

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Unfunded (TIF Project #20)

PROJECT DESCRIPTION AND JUSTIFICATION:

The Olympic Boulevard Corridor Trail Connector Study aims to connect the Iron Horse Trail to the Lafayette/Moraga Trail. The first phase of the overall project would include community engagement, environmental review, traffic analysis, and preliminary design for the proposed alignments. The second phase would include construction for the Newell Avenue portion of the project. The third phase includes construction for Olympic Boulevard and additional linkages, which may also include widening of Olympic Boulevard under I-680 to accommodate the trail facility, and would include bicycle detection, lighting, and a retaining wall.

PROJECT STATUS:

Not started. City staff will seek grant funding to complete the second phase of the project. The project will not move forward without grant funding.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate		\$300		\$3,000	\$4,400	\$7,700
Funding Sources						
Traffic Impact Fee		\$0		\$0	\$0	\$0
Unfunded Needs		(\$300)		(\$3,000)	(\$4,400)	(\$7,700)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Future improvements identified in the study may increase maintenance of added facilities.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

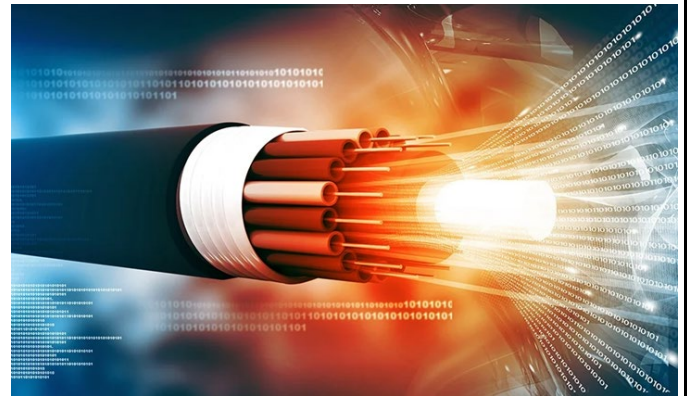

TRAFFIC MONITORING & COMMUNICATION TECHNOLOGY

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Unfunded (TIF Project #6)

PROJECT DESCRIPTION AND JUSTIFICATION:

Implementation of Intelligent Transportation Systems equipment, including fiber communication and other signal equipment in order to increase reliability of the centralized traffic signal network and enhance traffic signal systems to improve safety, multimodal access and efficiency.

PROJECT STATUS:

Not started.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate		\$500				\$500
Funding Sources						
Traffic Impact Fee		\$0				\$0
Grant						
Unfunded Needs		(\$500)				(\$500)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor increase in maintenance costs for new infrastructure

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

SHADELANDS MULTIMODAL IMPROVEMENTS - BIKE LANES AND SIDEWALK GAP CLOSURES

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Unfunded

PROJECT DESCRIPTION AND JUSTIFICATION:

Implement multimodal recommendations per the Shadelands Multimodal Plan, including pedestrian crosswalks, bike facilities, and traffic calming.

PROJECT STATUS:

The City was awarded Measure J grant funding for the initial study programmed in the City's 2018-2020 Capital Budget. Additional funds are needed for implementation of recommended improvements once the plan is finalized. Potential funding from Shadelands PBID, Grant Funding, TIF & adjacent property owners

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate		\$1,200				\$1,200
Funding Sources						
Traffic Impact Fee		\$0				\$0
Unfunded Needs		(\$1,200)				(\$1,200)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

May result in minor long-term increase in maintenance costs with new infrastructure.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

LINCOLN AVENUE PEDESTRIAN-BIKE PATH

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Unfunded

PROJECT DESCRIPTION AND JUSTIFICATION:

The project would provide a context-sensitive bicycle facility with pedestrian improvements and traffic calming along Lincoln Avenue from the Iron Horse Trail to N Main Street. The facility will provide safe and convenient access for bicycles and pedestrians from the Iron Horse Trail to the Library and into the traditional downtown. The project will provide a better circulation and promote active transportation in the City by enhancing safe and efficient travel for pedestrians, bicyclists, and motorists per the City Bike Master Plan.

PROJECT STATUS:

This project was presented to the Transportation Commission in March 2017, and a preferred alternative was selected. The study used funds appropriated in the 2016-2018 Capital Budget. Additional traffic analysis was requested by Council after the preferred alternative was selected. The second phase for 28-29 would complete pedestrian and bicycle improvements from the Iron Horse Trail to N Main Street.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate		\$550				\$550
Funding Sources						
Traffic Impact Fee		0				\$0
Unfunded Needs		(\$550)				(\$550)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor long term increase in maintenance due to improved and expanded infrastructure

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

OAKLAND BOULEVARD AND MT DIABLO CORRIDOR RECONSTRUCTION

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Unfunded (TIF Project #50)

PROJECT DESCRIPTION AND JUSTIFICATION:

The West Downtown Specific Plan envisions the reconstruction of Oakland Boulevard from Trinity Avenue to Mt. Diablo Blvd. This includes bike facilities, a median island, and sidewalks along Oakland Boulevard between Mt. Diablo Boulevard and Trinity Avenue. The project is aimed at making Oakland Boulevard multimodal accessible with wider sidewalks, bike lanes and beautified streetscaping. The construction will follow the vision and guiding principles provided in the Urban Design and Streetscape Standards. The concept of a “complete street” will be fulfilled with the implementation.

PROJECT STATUS:

Not Started - The project will be funded in two stages. The first stage, included in the 28-29 CIP Budget cycle will include preliminary design. Construction will occur in the second stage during the 32-33 CIP Budget cycle, subject to available funding.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate		\$350		\$11,000		\$11,350
Funding Sources						
Traffic Impact Fee		\$0		\$0		\$0
Grant		\$0		\$0		\$0
Unfunded Needs		(\$350)		(\$11,000)		(\$11,350)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor long term increase in maintenance due to improved and expanded infrastructure

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

TRAFFIC SIGNAL MASTER REPLACEMENT

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Unfunded

PROJECT DESCRIPTION AND JUSTIFICATION:

The traffic signal master allows centralized control of the signals within the City and improves the City's capabilities to manage traffic flow throughout the City. The current traffic signal master was installed in phases beginning in 2002. This project would replace the traffic signal master with new and updated equipment, allowing the City to continue to optimize the traffic signals and manage traffic.

PROJECT STATUS:

Not Started.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate			\$2,000			\$2,000
Funding Sources						
Traffic Impact Fee			\$0			\$0
Unfunded Needs			(\$2,000)			(\$2,000)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

No significant change

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

YGNACIO VALLEY ROAD OFF-STREET BIKE & PEDESTRIAN FACILITY FROM VIA MONTE TO SAN CARLOS

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Unfunded (TIF Project #24)

PROJECT DESCRIPTION AND JUSTIFICATION:

The project consists of a new off-street (Class I) bicycle-pedestrian path on Ygnacio Valley Road from Via Monte to San Carlos. The facility would be located in an existing landscaped area on the north side of the roadway and would not have negative impact on vehicular traffic, resulting in safer travel for both bicyclists and motorists. The project is aimed at completing the bike pathway network on the east side of the City and will allow additional bike connections between Via Monte and San Carlos.

PROJECT STATUS:

Not Started.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate			\$3,600			\$3,600
Funding Sources						
Traffic Impact Fee			\$0			\$0
Grant			\$0			\$0
Unfunded Needs			(\$3,600)			(\$3,600)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor long term increase in maintenance due to improved and expanded infrastructure

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

YGNACIO VALLEY ROAD OFF-STREET BIKE & PEDESTRIAN FACILITY FROM SAN CARLOS TO IRON HORSE TRAIL

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Unfunded (TIF Project #24)

PROJECT DESCRIPTION AND JUSTIFICATION:

The project consists of a new off-street (Class I) bicycle-pedestrian path (approximately 1.6 mile) on Ygnacio Valley Road from San Carlos to the Iron Horse Trail. The project is aimed at completing the bike pathway network on the east side of the City and will particularly benefit bicyclists who travel in the east-west direction.

PROJECT STATUS:

Not Started.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate			\$11,000			\$11,000
Funding Sources						
Traffic Impact Fee			\$0			\$0
Unfunded Needs			(\$11,000)			(\$11,000)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor long term increase in maintenance due to improved and expanded infrastructure

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

YGNACIO VALLEY ROAD/BANCROFT-WALNUT INTERSECTION IMPROVEMENTS

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Unfunded (TIF Project #10)

PROJECT DESCRIPTION AND JUSTIFICATION:

Existing traffic signal phasing and associated equipment for the Walnut Ave-Bancroft Rd approaches result in excess delays for drivers, pedestrians, and bicyclists and affects Ygnacio Valley Rd through traffic. The geometry of the intersection also plays a role in difficulty of improving the intersection. The proposed project would realign center medians and lanes to allow for protected and concurrent northbound and southbound left turn movements. In addition, the project would eliminate the free right turns from Ygnacio Valley Road improving pedestrian and bicycle safety. This project represents a potentially significant improvement to traffic flow in the entire corridor. Improvements would be consistent with recommendations contained in the Local Roadway Safety Plan.

PROJECT STATUS:

Not Started - City staff will seek grant funding to complete the project. The project may not move forward without grant funding.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate			\$4,500			\$4,500
Funding Sources						
Traffic Impact Fee			\$0			\$0
Grant			\$0			\$0
Unfunded Needs			(\$4,500)			(\$4,500)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor increase in maintenance costs for new infrastructure

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

YGNACIO VALLEY ROAD SOUNDWALL REPLACEMENT AND NEW SIDEWALK

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering
FUNDING SOURCE: Unfunded (TIF Project #53)

PROJECT DESCRIPTION AND JUSTIFICATION:

Remove the existing sound wall and relocate to provide room for a new sidewalk adjacent to Ygnacio Valley Road from John Muir Drive to San Carlos Avenue.

PROJECT STATUS:

Not started.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate			\$2,000			\$2,000
Funding Sources						
Traffic Impact Fee			\$0			\$0
Unfunded Needs			(\$2,000)			(\$2,000)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor increase in maintenance costs for new infrastructure - Overall reduced costs due to the elimination of the "living wall" and associated maintenance costs.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

MAIN STREET INTERSECTIONS REDESIGN

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering
Parking & Downtown

FUNDING SOURCE: Unfunded (TIF Project #17)

PROJECT DESCRIPTION AND JUSTIFICATION:

The existing traffic signals at the Main Street and Cypress and Main Street and Bonanza intersections are located on concrete poles which are not seismically safe. Because any upgrade would require an entirely new traffic signal, the project proposes to combine the signal upgrades with a complete intersection upgrades including bulb-outs at the curb ramps to reduce the pedestrian crossing distance and upgraded hardscape and landscapes.

PROJECT STATUS:

Not started. Potential grant funding.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate			\$450	\$1,000		\$1,450
Funding Sources						
Traffic Impact Fee			\$0	\$0		\$0
Unfunded Needs			(\$450)	(\$1,000)		(\$1,450)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Upgrade an existing facility - Similar maintenance and operational expenses are anticipated.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

TRAFFIC SIGNAL AT CIVIC AND ARROYO

PROJECT CATEGORY: Discretionary **REQUESTING PARTY:** Public Works – Traffic Engineering

FUNDING SOURCE: Unfunded (TIF Project #12)

PROJECT DESCRIPTION AND JUSTIFICATION:

Install a traffic signal at the intersection of Civic Drive and Arroyo Road. This intersection provides access from the Iron Horse Trail and Civic Park to downtown, and additional traffic control devices may be warranted in order to facilitate more efficient access for vehicles, pedestrians and bicycles. The project will include assessing appropriate traffic control at the intersection, including alternatives to a fully signalized intersection, design, and construction.

PROJECT STATUS:

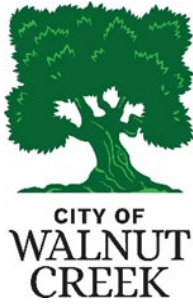

Not started. Potential grant funding may come through Innovate 680.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate					\$900	\$900
Funding Sources						
Grant					\$0	\$0
Unfunded Needs					(\$900)	(\$900)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor increase in costs for electricity and maintenance of any lighting improvements, otherwise, no significant change

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

HEATHER FARM PARK AQUATIC & COMMUNITY CENTER

PROJECT CATEGORY: Discretionary Projects

REQUESTING PARTY: City Council

FUNDING SOURCE: Measure "O", General Fund, Financing, Donation

PROJECT DESCRIPTION AND JUSTIFICATION:

This project would fund the environmental mitigation, demolition and construction of the Heather Farm Park Aquatic & Community Center.

PROJECT STATUS:

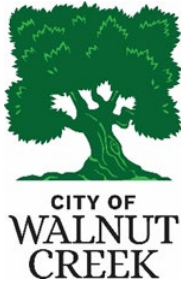

Design Concept has been approved and construction documents are in preparation.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate	\$77,000					\$77,000
Funding Sources						
Measure "O"	\$22,250					\$22,250
Previously Allocated	\$9,000					\$9,000
Financing	\$45,750					\$45,750
Unfunded Needs	\$0					\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor decreases with operational and maintenance costs with a new efficient combined facility

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

CLARKE POOL AND POOL HOUSE REPURPOSE MASTER PLAN AND CONSTRUCTION

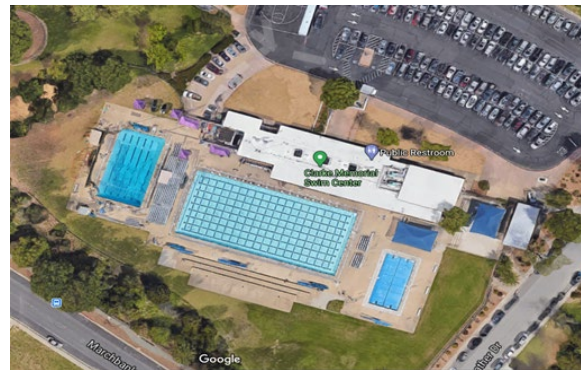

PROJECT CATEGORY: Discretionary Projects

REQUESTING PARTY: City Council

FUNDING SOURCE: Measure O (Unfunded from FY28 and beyond).

PROJECT DESCRIPTION AND JUSTIFICATION:

The Heather Farm Park Aquatic and Community Center Project is scheduled to be completed in 2027. With completion of the new Aquatic Facility, the existing pool and pool house will be demolished and repurposed for other needs at Heather Farm Park. This project will be completed in multiple phases with the first phase to create a masterplan for repurposing of the area and a second phase to design and construct the planned improvements.

PROJECT STATUS:

Not Started

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate	\$250	\$2,500	\$2,000			\$4,750
Funding Sources						
Measure O	\$250	\$0	\$0			\$250
Unfunded Needs	\$0	(\$2,500)	(\$2,000)			(\$4,500)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor long term increase in maintenance depending on result of Master Plan.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

ARBOLADO PARK IMPROVEMENTS

PROJECT CATEGORY: Discretionary Projects

REQUESTING PARTY: Public Works

FUNDING SOURCE: Unfunded

PROJECT DESCRIPTION AND JUSTIFICATION:

This project funded conceptual planning in 2022-2023 for potential new park amenities at Arbolado Park. The conceptual plans are in development and would be presented to the public for review. The conceptual plan will be modified as appropriate to reflect the public input. Improvements would be constructed in FY2030-2031

PROJECT STATUS:

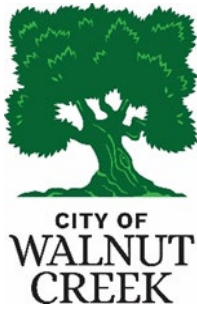

Not Started

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate			\$400			\$400
Funding Sources						
In-Lieu Parkland Fund			\$0			\$0
Unfunded Needs			(\$400)			(\$400)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Expect a \$15,000 annual increase need in the operating budget.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

OLD OAK PARK IMPROVEMENTS

PROJECT CATEGORY: Discretionary Projects

REQUESTING PARTY: PROS
Commission

FUNDING SOURCE: Unfunded

PROJECT DESCRIPTION AND JUSTIFICATION:

Old Oak Park is a 16-acre park at the north end of Rossmoor Parkway. Along with Tice Valley Community Park, this facility is the only park to serve the Tice Valley area. The initial project would create new trails with view spots, and some resting places within the park. The second phase of work would expand parking at the park along with signage improvements. Improvements at this site will be kept at a minimum, leaving most of the area undeveloped. The project will include outreach to the neighboring community.

PROJECT STATUS:

Not Started

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate				\$150		\$150
Funding Sources						
In-Lieu Parkland Fund				\$0		\$0
Unfunded Needs				(\$150)		(\$150)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor increase due to expanded infrastructure

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

WALDEN PARK PARKING LOT EXPANSION

PROJECT CATEGORY: Discretionary Projects

REQUESTING PARTY: PROS
Commission

FUNDING SOURCE: In-Lieu Parkland Fund

PROJECT DESCRIPTION AND JUSTIFICATION:

Walden Park is a popular park for its playground, disc golf, and easy access to the Iron Horse and Canal Trails. The relatively small parking lot is frequently full. This project would expand the parking lot to the south in an otherwise unused section of the park. The larger parking lot would allow more access to the park.

PROJECT STATUS:

Not Started

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate			\$250			\$250
Funding Sources						
In-Lieu Parkland Fund			\$250			\$250
Unfunded Needs			\$0			\$0

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor increase in maintenance costs

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

BOCCE COURTS AT LARKEY AND RUDGEAR PARKS

PROJECT CATEGORY: Discretionary Projects

REQUESTING PARTY: PROS Commission

FUNDING SOURCE: Unfunded

PROJECT DESCRIPTION AND JUSTIFICATION:

Bocce is an increasingly popular recreational sport. The City does not currently have bocce courts within any of our own parks. This project would construct bocce courts at Rudgear and Larkey Parks. \$50,000 was allocated to the 18-20 Capital Budget for preliminary designs. The Rudgear courts are planned for the FY2032-33 Capital Budget cycle while the Larkey courts are planned for the FY2034-35 cycle.

PROJECT STATUS:

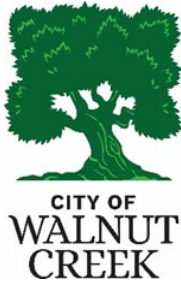

Preliminary Design Studies complete at Larkey and Rudgear.

CAPITAL COSTS (\$ in thousands)

YEAR	FY26&FY27	FY28&FY29	FY30&FY31	FY32&FY33	FY34&FY35	Total
Project Cost Estimate				\$200	\$200	\$400
Funding Sources						
In-Lieu Parkland Fund				\$0	\$0	\$0
Unfunded Needs				(\$200)	(\$200)	(\$400)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Approximately \$15,000/year increase in operational budget cost per facility.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

CIVIC PARK AND HEATHER FARM PARK MASTER PLANS

PROJECT CATEGORY: Discretionary Projects

REQUESTING PARTY: City Council

FUNDING SOURCE: Unfunded

PROJECT DESCRIPTION AND JUSTIFICATION:

The Parks Recreation and Open Space Commission and the City Council have recommended an update to the Civic Park Master Plan. The master plan update is in recognition of the new Heather Farm Aquatic and Community Center and new residential developments in the downtown to provide recreational amenities for residents. The master plan will review and update the existing Civic Park Master Plan which was completed in 2003 and subsequently amended.

In-Lieu Parkland Fund		\$0				\$0
Unfunded Needs		(\$393)				(\$393)

EFFECT OF THE PROJECT ON ANNUAL OPERATIONS; INCLUDING ESTIMATED COSTS TO SUSTAIN THE PROJECT:

Minor long term increase in maintenance depending on result of Master Plan.

FY26 - FY35 CAPITAL IMPROVEMENT PROGRAM PROJECT DESCRIPTION WORKSHEET

COMMUNITY GARDENS PLAN AND CONSTRUCTION

PROJECT CATEGORY: Discretionary Projects

REQUESTING PARTY: City Council

FUNDING SOURCE: Unfunded

PROJECT DESCRIPTION AND JUSTIFICATION:

The community gardens project would provide an additional location or supplement existing community garden locations for resident use. The existing community garden areas are popular with a substantial wait list. Additional community garden areas would better accommodate residents.

PICKLEBALL MASTER PLAN

PROJECT CATEGORY: Discretionary Projects

REQUESTING PARTY: City Council

FUNDING SOURCE: Unfunded

PROJECT DESCRIPTION AND JUSTIFICATION:

The Parks Recreation and Open Space Commission have recommended the development of a pickleball master plan to evaluate suitable locations for pickleball facilities. Pickleball is a popular sport that attracts many residents and local users. The noise and gatherings generated from the sport may not be suitable for all locations. This master plan would look for future locations in the City for pickleball facilities to meet user needs and minimizing impact to residents.

GREEN INFRASTRUCTURE IMPROVEMENTS

PROJECT CATEGORY: Discretionary Projects

REQUESTING PARTY: Public Works

FUNDING SOURCE: General Fund, Gas Tax, Drainage District Fees

PROJECT DESCRIPTION AND JUSTIFICATION:

Green Infrastructure facilities are used to filter roadway runoff before they enter the storm drain and into local creeks and the Bay. Their implementation are a permitted mandate from the State of California Clean Water Board. FY28 & FY29 includes a project to install a detention basin servicing as green infrastructure addressing water runoff from the increased impervious surface from the La Casa Via vicinity meeting Water Board mandate for 5.6 acres of impervious treatment for City of Walnut Creek. Other projects may include installation of various green infrastructure facilities in the City meeting Water Board regulations.

PROJECT STATUS:

Conceptual planning
