

STAFF REPORT

DATE: April 21, 2026
TO: City Council
FROM: Maricela Vidales, Management Analyst, Community Development
Sherri Metzker, Community Development Director
SUBJECT: Development Impact Fee Annual AB1600 Report for FY2024-2025

Recommendation

Receive the enclosed Annual Development Impact Fee Report which has been prepared for the public and City Council review, *pursuant to the requirements of Government Code Section 66006(b) and Government Code Section 66001(d), as amended by Assembly Bill (AB) 518 and Senate Bill 1693, this Development Impact Fee Report for the City of Davis is being filed for the fiscal year ending June 30, 2025.*

Fiscal Impact

This report is provided for informational purposes, and therefore there has no direct fiscal impact. The AB1600 report is a compliance document, require by the State of California and is not a budgetary document.

Council Goal(s)

This item relates to Council Goals

- Fiscal Resilience
- Climate Resilient Infrastructure
- Economic Development

Development Impact Accounts – Fund Balance

During fiscal year 2024/2025, the City collected \$2,698,961 in development impact fees, while expending \$4,248,793 on projects.

	<i>Year End Fund Balances</i>
<i>General Facilities (Fund 481)</i>	\$2,424,681
<i>Open Space (Fund 482) (1)</i>	\$1,524,467
<i>Parks (Fund 483)</i>	\$5,352,958
<i>Public Safety Facilities (Fund 484)</i>	\$1,557,939
<i>Roadways (Fund 485)</i>	\$1,548,935
<i>Totals</i>	\$ 12,408,980

Note: (1) The development Impact fees for Open Space are separate and distinct from the Open Space Protection Tax (Measure O)

Interest earned by fund has not yet been apportioned to the funds and will be included and reported with the next update to the AB1600.

Background and Analysis

Development impact fees are charged by local governmental agencies in connection with approved development projects. The purpose of these fees is to defray all or a portion of the cost of public facilities related to the impacts created by development projects, thereby implementing the project's "fair share" of the cost of the Capital Improvements Projects (CIP), consistent with the general plan. The legal requirement for enactment of a development impact fee program is set forth in Government Code Sections 66000-66025 (the "Mitigation Fee Act"), the bulk of which was adopted in 1987 as AB 1600.

In the City of Davis, development impact fees are collected at either building permit or if by way of agreement, at the time of certificate of occupancy for the purpose of mitigation of the impacts caused by new development on the City's infrastructure. Fees may only be used to finance acquisition, construction and improvement of public facilities needed as a result of new development.

Development Impact Fees are based on the premise that new development should pay the cost associated with growth. Conversely, the existing residents should only bear the cost of improving existing services, which may include expanded services that serve the

existing community. Development impact fees can be used for expansion, facility upgrades or additions necessary to help accommodate growth. Funds cannot be used to finance operations, maintenance or current deficiencies. For example, roadway impact fees may be utilized to improve an intersection to better handle increased traffic from new development, but cannot be utilized for re-paving because of general wear and tear.

For many years, the City has approximated the share of impacts that are associated with new development when the improvement or category includes both impacts of new development and needs of the existing development in the city. This is based on the relative size population residing in the city in 1987 and the growth of new development through build out. Improvements that are needed solely because of new development are generally paid for by new development.

A separate fund has been established to account for the impact of new development on each of the following type of public facilities:

- General Facilities
- Open Space
- Parks
- Public Safety Facilities
- Roadway

Fees imposed on new development within the city have been in place since 1990 with periodic updates. Water, storm water and sewer connection charges, which have similar characteristics to development impact fees, have different procedural and reporting requirements.

As indicated in the City's CIP, many other revenue sources are used in constructing or acquiring capital assets, including Federal and State grants, and City construction tax. A complete picture of the City's capital financing activity by fund will be shown in the City's Annual Budget.

Annual Report

State law requires any local agency that imposes development impact fees to prepare an annual report providing specific information about those fees. A brief description of the type of fee in the account, the amount of the fee, the beginning and ending balance of the account and the amount of the fees collected and the interest earned. Therefore, in accordance with the provision of the California Government Code Section 66006 (b) and 66001 (d), as amended by Assembly Bill (AB) 518 and Senate Bill 1693, this Development Impact Fee Report for the City of Davis is being filed with the City Council for the fiscal year ending June 30, 2025.

Description of Development Impact fees

General Facilities - To provide for the expansion, design and construction of General facilities as related to new development as specified in the City's General Plan and Capital Improvement Plan

Open Space – To provide acquisitions and development related to the Open Space program and Capital Improvement Plan (separate from the Measure O Open Space Tax)

Parks – The acquisition and development of parks as specified in the City's Parks Master Plan and Capital Improvement Plan.

Public Safety – To provide for the expansion, design and construction of Public Safety facilities as related to new development as specified in the City's General Plan and Capital Improvement Plan

Roadways – To provide for traffic improvements necessary to address the increase in traffic generated by new development as specified in the City's General Plan and Capital Improvement Plan

Current Fee schedule

The Development Impact Fee program (see attachment 1) was adopted on December 9, 2008 with an effective date of February 15, 2009. The cost of the improvements in the Capital Improvement Project is offset by the Development Impact Fees. The establishment and use of development impact fees are strictly controlled under AB 1600. Development impact fees must be used only for infrastructure that has a direct relationship to the impacts of new development. For additional information about development impact fees the link below provides a summary primer on the legal aspects of setting and use of Impact Fees.

<https://www.cityofdavis.org/city-hall/finance/fee-schedules>

Development Impact Fees are fundamentally tied to infrastructure needs associated with community growth. The General Plan update will also inform the city on those infrastructure needs and will determine the commensurate fee. Additionally, individual projects seeking General Plan Amendments prior to the next Development Impact Fee update may warrant consideration of supplemental fees on a case-by-case basis to account for potential impacts not previously accounted for in the current development impact fee model.

Development Impact Fee Project Identification

The Development Impact Fee Project Identification table illustrates the following reporting requirements defined by California Government Codes Section 66006 (b):

- An identification of each public improvement on which fees were expended and the amount of expenditures on each improvement, including the total percentage of the cost of the public improvement that was funded with fees.
- An identification of an approximate date by which the construction of the public improvement will commence if the local agency determines that sufficient funds have been collected to complete financing on an incomplete public improvement.

All of the current projects including all funding sources and approximate dates of funding can be found in the 2024/2025 CIP budget as part of the City's Adopted 24-25 Budget.

- [FY 2025-2027 Adopted Budget](#)

Compliance

The City Council at a public meeting has reviewed the following information pursuant to California Government Code Section 66006(b)(1), as is required by California Government Code Section 66006(b)(2), including:

- A brief description of the type of fee in the account or fund;
- The amount of the fee;
- The beginning and ending balance of the account or fund;
- The amount of fees collected and the interest earned;
- An identification of each public improvement on which fees were expended and the amount of the expenditure on each improvement, including the total percentage of the cost of the public improvement that was funded with fees;
- An identification of an approximate date by which the construction of the public improvement will commence if the local agency determines that sufficient funds have been collected to complete financing on an incomplete public improvement, as identified in Section 66001(a) (2), and the public improvement remains incomplete.

The City Council at a public meeting has reviewed the proposed findings, as required by California Government Code Section 66001(d) (1), including:

- Identify the purpose to which the fee is to be put;
- Demonstrate a reasonable relationship between the fee and the purpose for which it is charged;
- Identify all sources and amounts of funding anticipated to complete financing in incomplete improvements;
