

Fees are collected to fund construction of water facilities and water mains. Fees charged are based on meter size which determines capacity needs. Capacity is the amount available from the Indio Water Authority system when demanded by the user. Therefore the number of Equivalent Dwelling units (EDU) increases as the meter size (capacity) increases. The number of meters, and meter size, is estimated based on the type of development project. This fee structure Resolution 10242 was adopted on November 17, 2021 with an effective date of January 1, 2022.
