

As of March 1, 2013, a Supplemental Water Supply Fee is assessed on development projects in the City of Indio. The fee provides a framework to alleviate the strain on IWA's groundwater supply and is based on future water demands for new developments. Funds will be used to pursue the development of recycled water for future growth through indirect potable reuse injection. The fee varies based upon the development type, based upon the annual consumption factor with return flows multiplied by \$5,435, prorated by the size in acreage of the development type. This is defined in Section 33.066 of the Indio City Code.
