

Street Impact Fee

The Street Impact Fee became effective in July 1999. This fee partially offsets the Town’s costs of public roadway maintenance by assessing a fee of 1.0% (.01) on the valuation of all Town-issued building permits. As an example, a project with a \$100,000 building permit valuation would be assessed a \$1,000 Street Impact Fee.

TIBURON STREET IMPACT FUND

Starting Fund Balance, July 01, 2024	\$ 1,916,437.75
Revenues:	
Fees Collected	\$ 993,740.24
Interest Earnings	\$ 140,929.65
 TOTAL REVENUES	 \$ 1,134,669.89
Expenditures:	
Pavement Refurbishing	\$ (765,357.52)
Refund/Reimbursement	\$ 0
 TOTAL EXPENDITURES	 \$ (765,357.52)
 ENDING FUND BALANCE, JUNE 30, 2025	 \$ 2,285,750.12

In FY 2024-2025, the Town had approximately \$1,870,427.59 of Street-related expenditures (Projects 810285 and 810287), approximately 40% of which were funded using Street Impact Fees. No refunds or transfers were issued from this account in Fiscal Year 2024-25. All funds collected through Street Impact Fees are used to fund annual, on-going pavement refurbishing to maintain the existing level of service, in conjunction with State and County funding committed to Streets Maintenance.

Stormwater Runoff Impact Fee

The Town implemented the Stormwater Runoff Impact Fee in 2005. The Stormwater Runoff Impact Fee helps fund design and construction improvements to the public storm drain system to ensure it can manage increased runoff generated by new development. Impervious surfaces such as roofs, driveways, and paved areas prevent water from soaking into the ground, increasing stormwater runoff. The Stormwater Runoff Impact Fee is assessed at \$1.00 per square foot of new impervious surface created by construction projects. The amount charged is reasonably related to the Town’s proportionate cost of providing storm drain system improvements. Revenue collected is dedicated to stormwater infrastructure projects that serve the developments generating the runoff.
